

Chem-Dry of Park City, Utah Now Provide Tile & Grout Cleaning Services

July 09, 2019

July 09, 2019 - PRESSADVANTAGE -

Park City, Utah based Chem-Dry recently announced the addition of Tile & Grout Cleaning to their services, complementing the other solutions they provide to help their clients keep their home environment safe and clean.

The company notes that the cleaning of tiles and grout is a process that can extend for far too long if one does not have the proper tools to speed up the process. Furthermore, the results of this cleanup will likely yield poorer results than if it were performed with the appropriate tools and products.

This is where ChemDry comes in. Company representative Daryl Olsen asserts, "You can invest hours on your hands and knees trying to get dirt, gunk, and filth out of the stone and tile surfaces in your home, or save the back-breaking work for the qualified technicians at Chem-Dry. We'll make the process seem easier, and you'll wonder why you had not hired us in the past for this cumbersome process."

Making use of specialized cleaning solutions and powerful suction equipment, Chem-Dry can effectively remove dirt and grime from stone, tile, and grout, delivering a gleaming clean surface and extending the

material's life. This is especially useful given that permeable grout, tile, and stone are materials that tend to collect much more dirt, dust, and filthy fragments than any other. This can pose a serious threat to the home's residents, as germs and bacteria can build up in stone or tile surfaces over time.

The best way to ensure the safety of those who are exposed to these kinds of surfaces every day is to regularly clean and disinfect them, sterilizing the environment and removing it of any bacteria that may have formed since the last cleanup. While this can be a difficult prospect, it is an endeavor that is worth the effort, as the health of the entire family could be at risk. Olsen explains that if the cleaning is carried out properly, bathrooms, kitchen areas, and walls or any other tile and stone surfaces only have to be cleaned every 12 to 18 months.

He says that specialists should also be able to guarantee a long-lasting shine on such surfaces, and greatly minimize the quantity of effort it requires to keep these locations looking gorgeous until the next big cleanup is required. He asserts, "We will take care of the entire process, and ensure the safety of your loved ones along with the beauty of your home. Once we have your surfaces looking excellent, we will then apply a resilient sealant that helps secure it against dirt and other bits that can stain the appearance of stone, grout, and tile. The result will be a long-lasting and beautiful environment that inspires awe in anyone that visits your home. They will probably be compelled to ask how you manage to keep your home looking so clean at all times."

While the Tile & Grout Cleaning services offered by Chem-Dry may be a new addition, the company has already earned a reputation for the other services that they offer. They are considered one of the best cleaning companies in Park City. In a recent Google review, Daniel Jackson discusses the company's carpet cleaning services, saying, "I had just recently moved into a new home and felt disgusted with the carpet as soon as I saw it. I was thinking about removing it completely, but I decided to call Chem-Dry of Park City and give them a chance to clean it up. They sent out a tech named Duwane, who assured me the stains would be removed. When I returned home, the results were amazing. Carpets looked like they were new. I can't recommend them enough, as they saved me hundreds of dollars from replacing the carpets!"

For more information regarding Chem-Dry's new Tile & Grout Cleaning Park City Utah services, interested parties may contact Daryl Olsen, who will gladly answer any related inquiries. They may also visit the company's website to view a full list and breakdown of the services that the company's offers, as well as read their informative blog section.
