

Chem-Dry Of Park City, Utah Now Provides Upholstery Cleaning Services

July 14, 2019

July 14, 2019 - PRESSADVANTAGE -

Park City, Utah based Chem-Dry is pleased to announce the addition of Upholstery Cleaning to their renowned list of services. This new service expands the company's wide selection of existing offerings, enabling them to be a better all-in-one solution for their customers' cleaning needs.

The company points out that many homeowners do not give their upholstery the proper cleaning it requires, and do not understand the importance of doing so. Daryl Olsen, a company representative, says, "Many do not consider just how often their upholstered furniture is used on a daily basis. The kids coming home from school and forgetting to take their shoes off, family pets jumping on furniture, guests coming into the household, and just the daily wear and usage of your furniture causes dirt, pollen, dust mites, and other types of soils to gather in your upholstery. When all of this is considered, it seems like the last cleaning was an awfully long time ago."

The company explains that thoroughly cleaning upholstered furniture is the best way to ensure that no bacteria or germs are growing in it. Due to the vast amount of dirt and other sources of bacteria that furniture is constantly exposed to, even in an indoor environment, it is very prone to cultivating harmful pathogens that

could put the health of the entire household at risk. There are many skin infections, respiratory problems, and gastrointestinal infections which can be transmitted through dirty upholstery, especially for those who are either young or advanced in age since they are particularly prone to picking up an infection.

Furthermore, cleaning the upholstered furniture regularly is the best way to extend its lifespan and keep it looking as good as the day it was bought. Olsen advises homeowners to, "Consider the great investment which you have put into the upholstered furniture you have purchased for your household: Your living room, dining room, sitting room, bedrooms, rec rooms, and more. When you invest in regular upholstery cleaning, you are literally extending the life of your furniture. When you consider the cost of the initial investment against the cost of regular cleaning, contracting cleaning professionals regularly to care for your furniture seems more important than ever before."

Chem-Dry of Park City is a professional upholstery cleaner that strives to be reliable, delivering the best cleaning services in the area. The company already boasts a highly positive reputation and has even received favourable customer reviews on numerous platforms. On Google, Chem-Dry has already achieved an outstanding review score of 4.5/5 Stars.

A recent review written by Sophie Moore states, "I am happy with my Chem-Dry experience. They came in and cleaned several of my sofas and chairs, as well as a large rug. One of the chairs had been quite filthy, and it looked like a different chair when they were through with it. The work they did with my rug was amazing, and I don't think it has ever looked as good as it does now since I bought it. I had hired other companies for cleanings like this before, though none have ever managed to deliver such amazing results as Chem-Dry has."

Olsen says that the company's services are open to every member of the Park City community. He asserts that by leaving the hard work of cleaning upholstered furniture to Chem-Dry's team of experts, their customers can rest assured knowing their furniture will be cared for and treated properly. He states, "We know how to treat your fabrics in the best and the most effective way. We will get in all the nooks and crannies with specialized equipment and tools. You will know your fabric will be treated with care and in a timely manner. Sit back, relax, and enjoy the benefits that our upholstery cleaning brings to your home."

For more information regarding the new Upholstery Cleaning Park City Utah services offered by Chem-Dry, interested parties may contact Daryl Olsen, who will gladly answer any related inquiries. They may also visit the company's website to browse a full description of their services, as well as a blog section filled with useful recommendations and advice.
