Top Provider of Carpet Cleaning in Panama City, Fl Shares the Dangers of Mold for Children this Summer Break

July 03, 2019

July 03, 2019 -
Panama City, Fla. ? While children are out and about enjoying their summer breaks, now is one of the best times to schedule carpet cleanings, according to CCS Floor Care, a leader of carpet cleaning in Panama City, Fl.

According to various studies in the field, mold produces tiny, lightweight spores which not only initiate new mold growth but also compromise the indoor air quality. When inhaled, these spores cause the immune system to respond by creating allergic reactions as a natural defense against the foreign particles entering the body.

As children?s immune systems are weaker than adults, it is more likely they could have adverse reactions to mold in the home. Additionally, having mold around children could cause developmental complications such as allergies, and respiratory issues.

Mold can be hidden in areas such carpets, upholstery and other porous surfaces. Companies that specialize

in upholstery cleaning in Panama City, Fl, such as CCS Floor Care can help remove dangerous bacteria that could be invisible to the naked eye.

As children are relaxing and spending time in the home this summer, making sure it is safe and mold free is paramount to an enjoyable and healthy vacation for the whole family. Carpet Care Specialist is the premier carpet, upholstery, wood, tile & grout cleaning company on the beautiful Emerald Coast of Florida.
