

Implant Centre Martinko Fixes Any Problem With Teeth, Jaws Or Palate In Italy

July 16, 2019

July 16, 2019 - PRESSADVANTAGE -

Implant Centre Martinko, a private dental clinic in Trieste, Italy, has announced that they are able to fix any problem with the teeth, jaws or palate in Italy. Aside from offering the most up-to-date dental implantology, they also offer various kinds of dental procedures, including mobile prosthesis, dental crowns, dental veneers, dental bridges, and more.

"We are a dental practice where the fear of the dentist becomes a legacy of the past and a place with a relaxing atmosphere that represents present and future. To offer our patients excellence, we use new techniques of dental medicine, modern technologies, quality materials and individual approach with each patient," says Dr. Damir Martinko.

He continues, "Our team is made up of experts with many years of experience in the field of dentistry. Our professional staff that constantly updates and follows the trends in stomatology, offers dental treatments that comply with the highest world standards. The recently renovated spaces allow us to provide patients with an excellent service in the field of diagnostics, implantology, surgery, prosthetics, orthodontics, periodontology, radiography, aesthetic and general dentistry."

The primary service that they can provide are dental implants. The dental implant is by the far the best available solution for people who have lost a tooth or a number of teeth. Since it is fitted into the jaw bone in place of the missing tooth, it can serve as the real tooth, which means it is as if the patient had not really lost a tooth.

Biocompatible materials are used for the dental implants to make sure that there would be no irritation or inflammation in the area where they are inserted. Specifically, the dental clinic makes use of M.I.S. and Straumann implants to ensure the best results.

And because they know that patients have busy lives, whenever possible, they make use of the immediate loading protocol. Here, only one session at the clinic will be required to restore the patient's smile. In just a single day, the patient will be able to benefit the dental implant and use it to chew like a real tooth. This is a fixed prosthesis, which is believed to be the long-term solution for lack of tooth in patients.

Dental implantology has had a high percentage of success, when using the most up-to-date methods and equipment. Implant Centre Martinko makes use of an individualized approach for each patient, which is why they are considered by many to be the provider of the best dental implantology in Trieste or even in Italy.

Meanwhile, the clinic can also offer the standard mobile prosthesis, or dentures, which are the simplest and most affordable solution for lack of teeth. The mobile prosthesis can also be used to restore the patient's beautiful smile. And depending on the case of the patient, a partial mobile prosthesis or a total mobile prosthesis may be used.

Dental crowns may also be provided for patients whose tooth had to be opened in order to prevent the fracturing of the remaining tooth. They offer various kinds of dental crowns, depending on the dental conditions and aesthetic desires of the patients. The materials often used for dental crowns are all-ceramic, ceramic-metal, and ceramic-zirconium.

Dental veneers are for patients who have a problem with their anterior teeth. The veneers would be able to solve the aesthetic issues with their front teeth. Meanwhile, dental bridges offer an excellent way to replace teeth, whether it is just one tooth or several teeth that are missing. These can either be the traditional bridges or dental bridges on implants. The traditional bridges are those that have natural abutment teeth and elements that form the central part of the bridge. Depending on the dental condition and budget of the condition, the clinic will offer the best possible solution.

Those who would like to know more about the various dental procedures provided at Implant Centre Martinko can visit their website or Dr. Martinko's Twitter page at <https://twitter.com/DrMartinko>, or contact them on the

telephone or via email.
