

Ethos Spa Skin & Laser Center Offers Botox Cosmetic Solutions In New Jersey

July 16, 2019

July 16, 2019 - PRESSADVANTAGE -

Ethos Spa, Skin & Laser Center, based in Summit, New Jersey, has announced that they are offering Botox cosmetic solutions to help people regarding a number of issues, physically, mentally, and psychologically. Botox treatments are being used not just for treating wrinkles, but also for people to regain self-confidence. They are also offering discounts and certificates for new clients.

"Botox (also known as Botulinum toxin), is a natural protein that is often used in skin rejuvenation treatment as medication. It is derived from a natural bacterium which is found in nature, in places such as forests, lakes, and within many mammals and fish," explains Hardik Soni, founder and medical director Ethos Spa, Skin & Laser Center.

He continues, "Botox allows your facial muscles and muscles in other parts of the body to relax. Muscles that have been tense and taut for years find themselves de-stressed for the first time in years. Unwanted fine lines, wrinkles, crow's feet, and more vanish immediately, leaving behind soft and smooth skin. See the person you were a decade ago staring back at you in the mirror once more? let Botox bring the past back today."

Hardik Soni points out that plastic surgeons recommend Botox because it is one of the most effective ways to eliminate the stress from the face, in terms of both costs and surgical effort. There is no surgery needed for the procedure and it allows clients to step in or step out with little to no change in their day to day activities. Furthermore, after just one treatment, results can be noticed in just a few days, and those results could last for months.

Botox treatment may also be helpful in other ways, such as for acne management, chin and jawline softening, nose job similarities, neck smoothing, treatment of migraines, reduction of excessive sweating, lip lifts, twitching eye treatment, and more.

Hardik Soni has noted that more people are now interested in Botox treatment as the undeserved stigma against Botox injections and related skin care products has finally disappeared. Statistics have shown that 6.7 million Botox procedures were done in 2015 alone, making it the most common non-invasive plastic surgery procedure. There are 28 percent more 20 to 29 year olds using Botox today compared to 2010. And there are 337 percent more men getting Botox today compared to 2000.

The most common use for Botox injections is facial care because it has been found to be able to offer a remedy for several facial issues, such as lines and wrinkles; frown lines; forehead lines; skin tightening; crow's feet; treatment for acne scars; and more.

Botox is now also used in breast augmentation, offering an alternative to breast surgery and breast implants. Botox injections can now help with breast reconstruction issues, breast asymmetry, breast reduction, and breast lifts. Breast surgery is no longer the only option for such issues. For instance, with a Botox breast augmentation injection, the breasts can be made tighter and fuller in just a few days.

Botox may also be used instead of dermal fillers. People should not regard the two as the same. Although they are both substances injected into the body, they work in different ways. Botox and dermal fillers can help with thin lips, facial creases, shallow contours, dark eyelids, and recessed scars. Perhaps less commonly known is that Botox can be used for treating migraines and excessive sweating under the armpits.

Meanwhile, other treatments are available at Ethos Spa, aside from Botox. These include laser hair removal; coolsculpting; lip injections; Brazilian butt lift; tattoo removal; body contouring and fat reduction; Kybella injections for treatment of double chins; the Syneron Profound System for removing years off the face; and Trusculpt for treatment of problem areas on the thighs, abdomen, buttocks, neck, and love handles.

Those who are interested in learning more about the Botox treatments and other services offered at Ethos Spa Skin & Laser Center can check out their website, or contact them by telephone or via email. To be
