Bonds Available For Contractors With Bad Credit In LA

July 25, 2019

July 25, 2019 - PRESSADVANTAGE -

Burbank, California based Contractors Insurance Solutions, Inc. (CIS) recently announced that they will now be offering bonds for contractors with bad credit in LA. CIS specializes in general liability Insurance and California contractors workers compensation insurance. They take great pride in their personalized approach, creating policies for their clients according to their needs and situation.

Through this new initiative, CIS asserts they seek to help contractors who may be, or have gone through, difficult times which negatively affected their credit score, and therefore their ability to apply for a contractor bond. Matt Rogers, a representative of Contractor Insurance Solutions, says, "Given how important a contractor bond is for a company, having it denied to them due to their credit score is terrible. We are committed to helping LA contractors get through their difficult times, and helping them succeed."

The company notes that any private or city/state projects require contract surety bonds, which effectively means that denying a bond from a contractor halts their ability to work on any project and pushes them further into a more compromising situation. Furthermore, there are other types of bonds which a contractor needs to apply for a project?as is the case for bid bonds, which are submitted to show the financial ability of a contractor to complete a project. This is an initiative which CIS has worked closely with contractors to form, battling against time constraints and other setbacks to help their clients win and accept projects.

By using collateral for their contracts and agreements, Contractors Insurance Solutions can secure these deals for their clients regardless of their credit score. This helps contractors secure new projects to work on, leaving behind the poor circumstances which they may have found themselves in that originally led to a negative effect on their credit score. Rogers asserts, "While our specialization is to help those who want to buy surety bonds in Los Angeles, we can help contractors get their contractor license bonds and contract bonds. We provide everything they need to get back on their feet and begin working towards maintaining a successful footing as a company once again."

Due to their efforts to help local contractors secure new projects despite their difficulties, Contractors Insurance Solutions is well regarded in the area. They are known for being a reliable company that looks after the best interests of their clients. The company features many of their success stories in the field on their website as a means to encourage local contractors to contact them and buy surety bond in Los Angeles, should they need the assistance.

One of their most recent success stories comes from Mark T., who says, "After calling about 4-5 different agents and brokers looking for Painting Contractor's Insurance, I came across CIS and met Matt. He offered the best price right off the bat, didn't haggle, and offered excellent customer service. I'd recommend Matt without thinking twice."

Narciso Sandoval, President of Pro-Water Engineering, describes his own experience with CIS, saying, "We have been working with Matt for over a year already and we are more than happy to be with him. He has helped us in ways that no one else has. His customer service is unmatched, as it feels like you are talking to somebody who cares about your business. He somehow always finds the right answer and the perfect solution for our particular problems, solving them promptly and without hassle. I highly recommend his company to anyone in need of a contractor bond."

In addition to their contractor bonds, CIS offers general liability insurance and workers compensation insurance in California. These services are provided with the excellence and commitment that their clients are accustomed to. The company asserts that an expert will always be available to provide assistance and advice to their clients.

For more information regarding Contractors Insurance Solutions, Inc. interested parties may contact Matthew Rogers, who will promptly answer any inquiries regarding the company's services and their custom-made bonds. Clients may also visit the company's website for a thorough list and description of their services. The website also hosts an application form that clients may complete to apply for one of the company's California

contractor bonds.
