

jogBANDit Launches New Sports Armband For iPhones

July 27, 2015

July 27, 2015 - PRESSADVANTAGE -

jogBANDit, a Greensboro, North Carolina sporting company, has recently announced the launch of their newest product. The Active Sport Armband is designed to provide comfort and convenience to those who carry their smartphones with them when they walk, jog, or otherwise workout.

"Our unique design allows users to access all of the features on their phones, without removing the armband," says Tom Silver of jogBANDit. "They can enjoy their music while biking, jogging, or doing any other sort of workout and the phone stays securely in place."

The sports armband features adjustable Velcro bands that allow for maximum fit and comfort. Designed to fit iPhones 5 and 5s, the band has a key slot and reflective trim for added safety on evening and nighttime jogs or walks.

"This is the best thing that I've found for working out," says Amy. "It's perfect for carrying my iPhone with me when I work out. There's a spot for my house key and the earbuds plug in through a designated hole. Best of all, I don't have to worry about dropping my phone when I'm jogging."

The band is made of lightweight material that is durable enough to protect iPhones from sweat, scratches, and even weather related issues. It allows joggers, bikers, and others to avoid shoving their iPhones in their pocket when working out. iPhones are the most expensive smartphones currently on the market, and history has shown that they are prone to incur damage, particularly when they are not protected adequately.

The armband helps to protect the phone from bumps, scratches, and other issues that could cause expensive damage. jogBANDit is offering a 30 day risk free guarantee for all new customers who purchase the band on Amazon. Customers who are not completely satisfied can contact the company for a full refund within those 30 days.

"I wouldn't dare go jogging without it," says Amy. "It's perfect for my active lifestyle. I even take it to the gym with me when I'm lifting weights. I have never found anything else that keeps my iPhone as secure as this

armband."
