Get A Set Of Car Keys Cut Fast With The Key Guys

July 30, 2019

MINNEAPOLIS, MN - July 30, 2019 -
Today?s car owners in Minneapolis often turn to The Key Guys, a company known for providing high quality auto locksmith services all across Minneapolis, when they find that their car keys are stuck in the ignition. As there are few things more frustrating than getting one?s keys stuck in the ignition or the door, the company makes sure that they are always available to offer their assistance.

The Key Guys employs the most highly trained and experienced locksmiths in the industry, which effectively means that any customer who needs a new car key made can rest assured they are in capable hands whenever they contact The Key Guys. ?If you need a truck or auto key cut because you lost your only key, or if the key is stuck in the ignition or won?t turn?call us,? says the company. ?We can come to you at your location, which can be your home, office, or wherever you happen to be in the metro area. There is no need to pay for a tow to a local service station or dealership. There is no extra charge for the convenience of our on-site service.?

The cost of cutting an auto or truck key varies greatly depending on the key. Modern day car keys are more than just thin pieces of metal designed to fit into a particular slot; they are often programmed to interact with special sensors inside the vehicle they are made for. Due to this, making a new key can be a little more complicated than it used to be, and a bit more expensive too. Each van in The Key Guys? massive fleet of service vans comes equipped with the equipment needed to have any kind of car keys cut quickly and easily. This premium service, to the benefit of Minneapolis residents, comes at a much lower cost than might be charged at a dealership or any other locksmith company.

In addition to their much lower prices, The Key Guys will send one of their many vans to the client?s location and provide a replacement key or get the old one out of whatever hole it is stuck in, on site, in a very short space of time. ?We come to you at your location,? affirms The Key Guys. ?Your home, office or wherever you happen to be in the metro area. There is no need to pay for a tow to a local service station or dealership. There is no extra charge for the convenience of our on site service.?

A number of clients in Minneapolis have worked with The Key Guys and left positive reviews of the

company?s services. One review states, ?Highly recommended! I called this company this morning. Recommended off Angie's List. The guy said he does most of his business with other companies and dealers, though not as often to the general public.? The review continues, ?The guy who helped me was professional, friendly, confident, and peppy. My key and remote fob hybrid for my modern car fell off the carabiner?had me devastated. This guy was able to fully replace it, change the frequency on my car so the old key wouldn't work, and even gave me a spare standalone key in case something like this happened again! All of this was reasonably priced.?

?Absolutely outstanding company,? reads another review. ?I called them to help me with an issue on my truck lock and the guy who answered the call was very professional, helpful, friendly, and happy to help. He gave my phone number to an associate that was working on someone else's lock that was closer to me so I wouldn't have to wait so long, which I really appreciated. The guy gave me updates regularly so I would know when he would be here, and when he arrived, he was really friendly and worked hard to get it done in time for us to leave when we had to. The price I paid was excellent and he even gave me a copy so I wouldn't run into the same problem again. I highly recommend The Key Guys, and they will be the only ones I will call if I ever need keys or help with locks again.?

Interested parties can find out more regarding how the company can help them when they get their car keys stuck by contacting Bryan Nystrom of The Key Guys today. Further information is also available on the company?s website and social media platforms.
