

16th Annual Augusoft Lumens User Summit To Be Held In November 2019

August 13, 2019

August 13, 2019 -

Augusoft, a software company based in Minneapolis, Minnesota, has announced that the 16th Annual Augusoft Lumens User Summit will be held from November 17 to 22, 2019, at the Paradise Point Resort in San Diego, California. They want those who plan to attend to know that the theme of the 2019 summit is "connect". Thus, they are looking forward to connecting with their customers and all Lumens users to exchange ideas and best practices.

The summit will start with a toast to everyone's arrival on November 17th. The sessions and networking will be held on November 18th and 19th. And the Annual LERN Conference will be held in the same facility from November 19th to 22nd.

Augusoft is the provider of the well-known Lumens management system for continuing education and workforce development programs in the United States and Canada. The Lumens enrollment management system also allows the ability to accept cryptocurrency as a payment method. This is a first for the education market.

Lumens is a cloud-based SaaS registration system designed for use by schools to automate their enrollment system. Lumens is an enrollment management system that has been designed particularly for the non-credit education market. This system offers the advantages of growth and efficiency for continuing education, corporate training, workforce development, and certificate programs in hundreds of universities and colleges in the U.S. and Canada.

There are four kinds of Lumens products. The Lumens Standard (STND) offers online self-registration, combined with catalog, web-hosted course, and report management tools. Lumens Collective (CLTV) allows both member and non-member registration while offering the ability to offer membership benefit discounts and/or other special accommodations.

Meanwhile, Lumens Professional (PRO) is the most comprehensive SaaS solution in the market designed to help manage all aspects of a successful open enrollment program. It includes all of the features of Lumens Standard and Lumens Collective and it adds waiting list management, room management, grades and attendance, discounts, promotions, class series, third party pay, flexible reporting, and more.

Lumens Integrated (iPRO) is the only system that integrates with all three major ERP systems: Oracle PeopleSoft, Ellucian Colleague, and Ellucian Banner.

Augusoft is a privately held company that was established in 1994 and provides cloud-based SaaS enrollment management systems for corporate and continuing education programs. It was in 2000 that Augusoft collaborated with Learning Resources Network (LERN) to create and then introduce Lumens, the first web-hosted class registration management system designed particularly for non-credit corporate education, continuing education, and workforce development programs. By complementing traditional academic systems, Lumens is able to help increase online self-registration up to 80 percent, decrease cancellation rates, and offer the best data collection and reporting tools.

Those who would like to know more about the continuing education software systems offered by Augusoft or their Annual Lumens User Summit can visit their website or contact them by phone or by email.
