Roof Repair London ON Company Has A New Five Star Review

July 30, 2019

July 30, 2019 - PRESSADVANTAGE -

Cub Roofing, a roofing company based in London, Ontario, Canada, has announced with pride that they have recently received a five star customer review on their Google Maps page. They are a roofing services company with more than 20 years of experience in offering satisfactory services. As such, they guarantee thorough repairs and replacement, in-depth inspections, and complete new roof installations.

In the recent five star review, Jade P. said, "Thoroughly impressed with the quality roofing work these guys put out on our London home. The clean up after the work was great, would definitely recommend."

Bella Reynolds, spokesperson for Cub Roofing, explains, "No one really knows when storms will strike and cause detrimental damage to your roof. True enough, calling a reliable contractor after a hailstorm is imperative. However, what if your roof suffered massive damages right after a regular intensity storm? There's no way to know until you call reliable professionals to inspect your roof."

Only recently, Cub Roofing had also launched their new website. This was revealed in a press release that can be found at <http://www.digitaljournal.com/pr/4380417>. The new website was designed to cover in more

detail the various roofing services offered by the company so that site visitors will get a better idea of the services that they can provide. The services offered by Cub Roofing include roof repairs, siding installation, gutter repairs, roof replacement, siding repairs, and deck construction.

Cub Roofing has the advantage of having worked with dozens of homeowners and commercial, corporate, and institutional property owners in locating roof damages, fixing roof leaks, and determining the various causes of roofing damages. In all of these projects, they were able to improve the life span and long-term performance of the roofing materials that were currently present on the roof.

For residential roofing services, they can work with asphalt shingles, metal roofs, traditional clay tiles, and slate tiles. For commercial roof services, they are capable of working with single-ply membranes, modified bitumen, and tar & gravel roofs.

Cub Roofing has already repaired hundreds of asphalt shingle-roofed homes across London, Ontario. Thus, this traditional roofing material is the company's expertise and they guarantee satisfactory repair and the solution for all problems regarding asphalt-shingle roofs.

Meanwhile, while metal roofing is one of the most durable roofing materials, they will not last forever and will still need repairs. Thus, Cub Roofing offers any needed repairs for metal roofing. Likewise, they can also offer the same kind of services for long-term mason-style clay tiles and slate tiles.

For commercial roofing, whether it is TPO, EPDM or PVC single-ply membrane roofs, they can make the necessary repairs to enhance the roof's performance and life span. The same can be done for modified bitumen flat roofs and tar & gravel roofs.

For those who have old roofs, it is important to have it checked if there is already a need for roof replacement. Some of the indications are signs of vegetation, a roof that is more than 30 years old, and damaged flashing.

According to Bella Reynolds, moss is a definite indicator that the roofing material has started to rot. This usually happens with asphalt shingles, wood shakes, slate tiles, and clay tiles. While the roof material will still last for a few more years, the moss is actually sapping nutrients that are found in the roofing material with the result that they become brittle and more prone to damage.

Meanwhile, experience has shown that roof materials usually deteriorate after more than 25 years and will continue to do so as the years go by. Thus, a roof that is more than 30 years of age can easily be damaged significantly by a storm, resulting in the need for a roof replacement. It is a good idea to have the roof inspected and possibly replaced before this happens.

Those who require more information about the roofing services provided by Cub Roofing can visit their website or their media room at <https://www.pressadvantage.com/organization/cub-roofing>, or contact them by telephone or through email.
