

## **Metal Roofing Company In Corpus Christi Gets Five Star Customer Review**

*August 08, 2019*

August 08, 2019 - PRESSADVANTAGE -

Galvan Builders, a metal roofing company, based in Corpus Christi, Texas, has announced with pride that they have received a five star review from customer April Ocañas. April's home required a new roof and she was very satisfied with the roof installed by the metal roofing company. She highly recommends them and she plans to use them for any future construction requirements.

In the five star customer review, April said, "I had the best experience with Galvan Builders Construction Company. My home was in need of a new roof and the thought of finding an honest construction company was unheard of. We interviewed many companies and didn't feel comfortable with any of them until we met with David and Dina Galvan. They were honest and humble and went out of their way to help us and meet our needs and price point. Their work is top notch and done in a timely manner. I highly recommend them and will use them again for any of our future construction needs."

Galvan Builders is a metal roofing company in Corpus Christi that is made up of a team of expert and professional roofing contractors with 36 years of experience. They specialize in roof replacement. They are a team of highly skilled roofing professionals who aim to provide each client with the roofing solution that is

needed.

“It makes us happy that all of our roofing projects end up successful with smiles and handshakes from our clients,” says David Galvan, co-owner of Galvan Builders. He continues, “We want to keep roofing and setting high standards for roofers around. To this end, we handle every job with skills and knowledge gotten over the years of our experience, while sticking to our core values. To ensure that every job we do comes out great, we pay attention to each detail of your requirements and the roofing problem to make sure that you get the best roofing services in Corpus Christi.”

The services offered by Galvan Builders are very much in demand in Corpus Christi because metal roofing has been gaining in popularity such that many building owners are changing their roofs to metal. And it seems that this trend is not showing signs of slowing down any time soon. The reason property owners are choosing metal roofing is because of the benefits and possibilities that it brings to roofing. These advantages have to do with durability, versatility, energy efficiency, and savings.

First of all, metal is a highly durable material when used as a roofing material because it can handle temperature change, it is resilient to weather, and it can maintain its integrity for a long time. Quality metal roofs usually have a lifespan of 30 years and more, which makes them a good investment for any type of building.

Second, metal roof can never be boring because it offers a wide range of options with regards to types and colors. Metal roofs are often coated with high quality coatings, which enhance the performance of the roof and extends its lifespan. And these coatings are available in a variety of colors that make the home more attractive.

Another benefit is that the thermal properties of metal roofs are appropriate for the climatic conditions in Corpus Christi. The metal roof is able to reflect a significant amount of UV rays and heat, which makes the indoor building air temperature at a stable level.

And finally, because of its energy efficiency and durability, metal roofing can save building owners money in the long run because they won't require frequent maintenance, and they won't need replacement any time soon. Plus, owners can save on energy bills because less electric power is required to maintain a comfortable indoor air temperature.

Galvan Builders always ensures that they are using high quality materials. When this is combined with the skills and experience of their team of expert roofing contractors, the result is a roof that can last for a lifetime. People who need more information regarding the Galvan Builders customer review and the various roofing services that they can provide, can check out their website, contact them on the telephone, or contact them

through email.
