

Dr. Satnick Is 2019 Nextdoor Neighborhood Favorite For General & Sleep Apnea Dentist In Ventura CA

August 23, 2019

August 23, 2019 - PRESSADVANTAGE -

Dr. David Satnick DMD, a sleep apnea dentist in Ventura CA, has been voted the 2019 Nextdoor Neighborhood Favorite for General & Sleep Apnea Dentists in Ventura. Aside from being a favorite sleep apnea and general dentist in Ventura, Dr. Satnick is well-known for providing quality dentistry services, such as restorative dentistry, cosmetic dentistry, periodontal treatments, porcelain veneers, teeth whitening, dental implants, dentures, and TMJ therapy.

Dr. Satnick stands out among the dentists in Ventura because of his ability to treat patients who suffer from obstructive sleep apnea and loud snoring. He explains the importance of the treatment, "We're aware that snoring may affect your relationships and may also embarrass you (especially if you're waking yourself up!). The bad news is that snoring is often an indication of obstructive sleep apnea (OSA), which is a serious medical condition that needs immediate treatment. Left untreated, OSA can increase the risk of high blood pressure, stroke, and heart failure."

Dr. David Satnick DMD winning the Nextdoor Neighborhood Favorite award for 2019, which he also won for 2017 and 2018, means that he has earned the distinction of being the preferred recommended dentist in

Ventura, California, on Nextdoor.com. Nextdoor is a free and private social network for neighborhoods and Neighborhood Favorites is Nextdoor's annual awards program that permits neighbors to recommend and recognize their most-loved businesses in and around their neighborhood.

Dr. Satnick says, "We're deeply honored to have been chosen as the preferred recommended dentist in Ventura. We have also received the award in 2017 and 2018. This means that we have been doing things right and we intend to continue doing that. In fact, we even intend to focus on continuous improvement to ensure that our patients will always receive the best kind of service that they deserve."

The Nextdoor Neighborhood Favorite award is important because Nextdoor is composed of online communities where members get to know each other, ask questions, and exchange advice and recommendations. Getting the votes of the neighbors as the preferred recommended dentist imply that the patients of Dr. Satnick have been very satisfied with the results of his services with regards to general dentistry and the treatment of sleep apnea.

Meanwhile, Dr. Satnick also wants to announce a new patient special. A \$100 dental credit is being offered to patients that they can apply for their first visit, for dental exams, dental x-rays, teeth cleaning, or teeth whitening. The offer is valid until August 31, 2019 and patients are encouraged to schedule their appointment as soon as possible.

According to Dr. Satnick, those who may have sleep obstruction may suffer any of the following conditions: chronic and loud snoring; constantly waking up during the night; having morning headaches; waking in the morning with a dry mouth or sore throat; experiencing excessive exhaustion; being moody and irritable without any discernible cause; inability to concentrate during the day; having high blood pressure or GERD; and risks of OSA.

Some people have higher risks of having OSA. They include men; those who are overweight; those who have small upper airways or large necks; genetic predisposition to OSA; smoking or drinking excessively; those who are older than 40; and those who have recessed chins and large overbites.

Dr. Satnick use a CPAP (continuous positive airway pressure) alternative for treating OSA. Although CPAP is the most popular treatment for sleep apnea, there are other options. One of the common problems with CPAP therapy is the discomfort or difficulty in tolerating the mask and the air pressure.
