

Lake City Chiropractor Receives Five Star Review

August 14, 2019

August 14, 2019 -

Florida Spine & Injury, a chiropractic clinic in Lake City, Florida, has announced that one of their chiropractors had recently received a five-star customer review. A patient of Dr. Kimmel R. Chisolm, D.C. felt very satisfied with the manner in which the chiropractic doctor had provided the treatment that he left a five-star review on the clinic's Google Maps page.

Mark C., the very satisfied patient of Dr. Chisolm, said, "Doctor Chisolm is dedicated to really helping his patients. I have not heard a doctor talk in a positive manner like that in probably over a decade the way he spoke to my wife really made my day. That is how doctors used to be when I was a kid back in the 80s. This may not be the biggest, most modern place for treatment but I would not want to come anywhere else personally nor would I take my family anywhere else. The staff is excellent as well. I have not had any rude comments or problems even when we missed appointments. The ladies here are great too." Those who would like to read the customer review can check it out [here](#).

Dr. Kimmel R. Chisolm graduated from the University of Central Florida and he later obtained his chiropractic degree from the Palmer College of Chiropractic's Florida campus in December 2015. He began practicing as an Associate Chiropractor at Ocala Spine and Injury in January 2016.

The primary service offered at Florida Spine & Injury is, of course, chiropractic care. They are able to serve various places aside from Lake City. These include Ocala, Gainesville, The Villages, Summerfield, Silver Springs, Anthony, Marion Oaks, Citra, Spar, Top of the World, Oak Run, Silver Springs Shores, Lake Weir, Fort McCoy, Salt Springs, Belleview, Reddick, Arredondo, Micanopy, Inverness, La Crosse, White Springs, Greenfield, Live Oak, High Springs, Newberry, Five Points, and Worthington Springs.

The chiropractors at Florida Spine & Injury help their patients with state-of-the-art evaluation and treatment methods for treating neck pain, back pain, sciatica, headaches, and more. The treatments they provide are also designed to treat people who suffer from trauma caused by personal injury accidents, such as work injuries, auto accidents, and whiplash.

They want to point out that chiropractic care is a non-invasive type of medical care that is used for treating muscle and joint issues including but not limited to, neck pain, back pain, headaches, and pain in the joints of the legs and arms. Chiropractic can also help to eliminate misalignments in the spinal column, with the result of restoring proper nerve communication and innervation from the brain to the body, so that all organs, tissues, and muscles are operating at their maximum level.

The misalignments are eliminated by the chiropractors through specific manipulations or adjustments to the affected joints and tissues. The joint manipulation is designed to restore joint mobility through the manual application of a gentle, controlled force to the joints that have lost their normal movement due to an injury. These treatments have been observed to help relieve acute pain symptoms, get rid of soft tissue adhesions, and decrease muscle tightness.

The joint injuries could have been caused by a single traumatic event, such a car accident; a slip and fall; or repetitive stresses, such as sitting in an awkward position with improper spinal posture for long periods of time. If these joint issue and injuries are not treated promptly by a skilled chiropractor, the tissue that connects the joint structures will become extremely taut, causing adhesions called trigger points. Furthermore, because the joint is limited in its range of motion, the fluid that usually hydrates the area is not able to properly lubricate the joint, thus allowing arthritis to set in over time, which then worsens the pain in the area.

People who would like to learn more about the services provided by a Lake City chiropractor can visit their website. Those who want to schedule a consultation can also contact them by phone or via email.
