

## **Sunspeed Transport Services Ltd Offers Data Center Migration Services**

*August 19, 2019*

August 19, 2019 - PRESSADVANTAGE -

Sunspeed Transport Services would like to make potential clients in the UK and Europe aware of their server relocation and data centre migration services. As one of the top names in the server relocation data centre migration industry, Sunspeed offers high quality service, and is guaranteed to make sure each client enjoys a quick and hassle free transfer. Many high profile companies have worked with Sunspeed and seen great results over the years.

The company has been servicing a wide variety of clients for nearly 30 years, specializing in server migration and data centre relocation. One of the things that sets Sunspeed apart as a company is their strong commitment to being security conscious and reliable as an IT relocation partner. This commitment has led to Sunspeed becoming one of the most trusted IT transportation services in the world. Their mission is to deliver the most secure and reliable physical migration solutions in the UK and Europe, and the past 28 years have seen them achieve great success in meeting this goal. By making use of their technical expertise and sound methodology, Sunspeed is able to deliver service of the highest quality regardless of the scale of the project. With Sunspeed, risk and down-time are both minimised while efficiency and convenience are maximised.

A data centre migration project is a critical and complex business activity that must be approached with the utmost professionalism, says Sunspeed. At Sunspeed, taking the time to understand your exact requirements is our number one priority, translating your challenges into an effective and safe relocation that minimises disruption and downtime. At Sunspeed, all operating personnel are cleared to a Security Check Enhanced level, vehicles are unlicensed and fitted with multi-level security features, and strict security protocols are enforced to ensure the discreet and safe transportation of servers and data.

The emphasis that Sunspeed places on security has earned them the responsibility of carrying out IT migration services for some of the world's largest companies, including CGI, Oracle Corporation, HSBC, Citigroup, Fujitsu, Chevron, Barclays, and the Ministry of Defence (MoD). From very small to very large relocation projects, Sunspeed has the knowledge and tools required to ensure every step in a transfer goes smoothly. The IT migration company states, Not only can Sunspeed support companies and public sector organisations with the physical movement of their equipment, we can provide an end-to-end physical solution that covers everything from the initial discovery audit and the preparation of key migration documents, such as rack plans and patching schedules, to the delivery of full cabling solutions to support the migration.

A number of the company's clients have left reviews praising Sunspeed for their high quality service. Kevin, an IT director who made use of Sunspeed's services, is quoted saying, Your coordination, the engineers on the day Paul and Ashley, Dan in sales everything was absolutely brilliant, and I am not one to make throwaway statements. We had plenty of other things to keep us busy leading up to and on the day, so it has been a great relief to be in such capable hands. Paul and Ashley were great, extremely helpful, and proactive, and the service from Sunspeed has been faultless.

Another review says, Please accept our thanks and pass on our thanks to your teams for a great job well done. Certainly, our Data Center Manager has said he has never seen such a tidy job done with the cabling and was very impressed by the way your teams worked. He was very impressed by the way it was planned and how efficiently the work was carried out. You have certainly made a very good impression. I have very much enjoyed working with you and hope we can work together again in the future.

Companies or individuals looking for a trustworthy, reliable, and efficient server migration and data centre relocation service can find the answer to all their IT relocation needs at Sunspeed Transport Services Ltd.
