

Ethos Spa, Skin and Laser Center Specializes in Botox in NJ

August 19, 2019

August 19, 2019 - PRESSADVANTAGE -

Ethos Spa, Skin & Laser Center in Summit, New Jersey, specializes in Botox injections. The premier spa center offers a wide range of treatments to help men and women to look and feel their best including Botox injections that are designed to eliminate fine lines and wrinkles. The center states that they specialize in Botox for those in New Jersey and nearby areas and that they have special offers for new clients.

Dr. Hardik Sodi, founder and medical director for the center, says, "Botox is something that got off to a bad start. People did not understand the benefits of this treatment and so it developed sort of a stigma. Today however, Botox is one of the most popular treatments that we offer and it provides a host of benefits."

Botox is a natural protein that promotes skin rejuvenation. Botox is naturally derived from bacterium that is found naturally in forests, lakes and other areas. Once injected, Botox allows the muscles to relax. Muscles that have been tensed can cause unwanted lines and wrinkles. Once these muscles are relaxed, those lines and wrinkles are eliminated.

"It's a safe and highly effective procedure for eliminating wrinkles and lines from the face and other areas of

the body,? says Dr. Soni. ?Plastic surgeons are actually recommending Botox as opposed to plastic surgery in many cases, because it provides results without the invasion of surgery. The recovery time is nearly non-existent. In most cases, patients go back to their jobs or other activities on the same day as their injections.?

More on Botox and its benefits can be seen at <https://ethos-spa-skin-and-laser-center.business.site/>. Dr. Soni adds that this is a very safe procedure, particularly when compared with traditional plastic surgery. He states that clients can get the same results in many cases with Botox that they get with plastic surgery but that this treatment option is safer, faster, offers less downtime and is less expensive than traditional plastic surgery.

Botox is not only used for the elimination of lines and wrinkles. Dr. Soni states that his office can also provide Botox injections for the treatment of acne, for treating migraines, and for a number of other uses. Botox injections have recently been researched for their effectiveness in stopping migraine headaches and they have been used successfully to treat twitching eyes, to lift lips, to reduce excessive sweating and for a number of other purposes.

The most common use for Botox is still to eliminate fine lines and wrinkles, particularly around the eyes and on the forehead, according to Dr. Soni. He adds that his office provides this treatment for patients and that anyone who has questions is welcome to contact the office to learn more so that they can make an informed decision about whether or not Botox is the right choice for them.

Dr. Soni adds that the center?s website offers more detailed information about this and the other treatments that they offer. Those who are interested can also connect with the center on their official Facebook page at <https://www.facebook.com/MyEthosSpa> to get updates about any new procedures that they may be offering and to connect with other clients and learn more about their own experiences with Botox or any of the services that the clinic provides.

Ethos currently offers Botox injections, as well as CoolSculpting (R), Brazilian butt lift, Kybella injections to treat double chin, hair removal and a number of other services. Dr. Soni states that anyone who has questions about these services can schedule a consultation to sit down and speak with a staff member regarding their needs and the best service to fit those needs.

Those interested in learning more can visit Ethos on their website or contact them directly by phone or email to schedule their initial consultation. Dr. Soni adds that new clients are eligible to receive special pricing and that anyone scheduling an appointment for the first time should mention this as they are scheduling to take advantage of their offer.
