

Implant Centre Martinko Recognized As Leaders In Their Field

August 19, 2019

August 19, 2019 - PRESSADVANTAGE -

Implant Centre Martinko in Trieste TS, Italy, has been recognized by patients as the very best in their field. The dental center provides the best possible service in the fields of diagnostics, implantology, dental surgeries, prosthetics, cosmetic procedures, periodontics and general dentistry. Dr. Damir Martinko, owner and operator of the dental practice, states that they are soon releasing their new Customer Relationship Management solution which will help them to provide an even more positive experience for their customers.

Dr. Martinko says, "We are pleased to announce the upcoming launch of this new system that will enable us to help our patients throughout their experiences with us. We try to always provide our patients with the very best in a wide range of dental services. Our goal is to see every single patient smiling as they leave our practice."

Dr. Martinko adds that the practice is proud of the feedback that they have received from their patients. Patients all agree that the dental practice provides the specific services that are needed to help them to feel confident in their smiles and the dental practice accepts patients of all ages.

?We like to think of ourselves as a family practice,? says Dr. Martinko. ?We want our patients to bring their families. We would like nothing more than to see entire families of people with beautiful smiles.? Dr. Martinko states that those who are interested can learn more about the specific range of services that they offer by visiting them online at <https://sites.google.com/site/dentalimplantstrieste/>.

Dr. Martinko explains that dental implants are good choices for those who have lost single teeth or even all of their teeth for any number of reasons. Implants work by attaching to a titanium anchor. The anchor is inserted into the gums and the implant attaches to the top of the anchor for security. Dental implants provide much more security than dentures and can be used to replace one single tooth or any number of missing or broken teeth.

Dr. Martinko adds that there are many benefits to choosing implants. Implants enable patients to have a complete smile once again, which is beneficial for cosmetic purposes and for the patient?s self-esteem. They also help to replace missing teeth that could be causing issues when the patient chews or speaks. In addition to implants, the center offers a number of other dental procedures and implant surgeries.

Dr. Martinko explains that before the surgery, the patient will need to be evaluated to determine if he or she is a good candidate for implants. He adds that any time a patient is seen in his office for the first time, they sit down and do a thorough examination and have a consultation where Dr. Martinko can fully explain the situation of the patient?s oral health and any suggestions that he has for correcting these conditions. He adds that his practice always ensures that patients fully understand their diagnosis and any procedures that they need to make their teeth and gums healthy once again.

Patients agree that Dr. Martinko takes his time and fully explains everything to them, ensuring that they fully understand before they go on to the next phase. This is one reason why the dental practice is currently hailed as the premier provider of dental implants and various other dental services throughout all of Italy.

Dr. Martinko states that he and his staff simply want their patients to experience beautiful and healthy smiles. Those who are interested in learning more about the practice and the various services that they provide can visit them online at <https://implantcentremartinko.business.site/>. Those who wish to schedule an appointment can do so through the website or by calling the dental practice directly. Dr. Martinko urges those who have not had a dental checkup in quite some time to call soon and make an appointment to maintain their dental health. The dentist recommends semi-annual checkups for those who are not currently experiencing any dental issues.
