

Dentist In Andover Hampshire Offers Teeth Whitening Services To Private Patients

August 21, 2019

August 21, 2019 -

Andover, Hampshire based Dental Concepts recently reached out to the community in Andover and surrounding areas to announce the availability of their teeth whitening procedures. The local dentists are known for the quality and affordability of their services, and Andover residents have shown great appreciation towards the dental care practice for the commitment that they bring to their work. More information on the acclaimed dentists is available at the following link: http://dental-concepts.com/.

Dental Concepts affirms that, despite its underrated nature, teeth whitening is often among the most meaningful cosmetic dentistry treatments that a patient can receive as it provides a great boost to their confidence and self-esteem. Dr. Manish Chitnis, the lead practitioner at Dental Concepts, explains, "Although teeth whitening is one of the most popular cosmetic dentistry treatments available, it is often seen as a minor improvement to an individual's looks. It is sometimes even dismissed on the grounds that the difference is unnoticeable. The truth is that, if done correctly, the patient's teeth should be shining whiter than ever, and it should also be a long-lasting treatment."

Dr. Chitnis explains that, while proper dental hygiene plays an important role in preventing teeth stains, other factors can cause such discolouration as teeth are not only stained by the foods and drinks that are consumed. One common cause for teeth stains is smoking, and it is not a coincidence that an avid smoker's teeth always seem darker and less healthy, overall, than those of a non-smoker. With smoking being a common habit among individuals of all ages, it is understandable that smokers represent the majority of the 100,000 patients who undergo teeth whitening procedures every year in the UK.

The dentistry center explains that the popularity behind teeth whitening lies in its simplicity and the amazing results it can deliver. They assert that it is a simple, non-invasive cosmetic dental treatment that can change the colour of one's natural tooth enamel and enhance the beauty of their smile. The degree of whiteness achieved will vary from patient to patient and with the type of bleaching process that the patient chooses, as they will be in charge of determining the extent of their teeth's whitening. More information on this topic is available at the following link http://www.dental-concepts.com/teeth-whitening-andover-whitchurch-hampshire/.

To deliver a treatment that fully satisfies their clients, Dental Concepts works alongside each patient, getting to know their routine and dental hygiene habits in order to devise the best strategy to go about proceeding with the treatment. Once this has been determined, the treatment itself is carried out by one of the facility's experienced clinicians, who will ensure that the patient's vision is brought to life according to their expectations. It is due to this commitment that the local dentists are widely supported by the community, as their teeth-whitening patients end up satisfied with the result.

One of their most recent customer reviews describes the experience of Daniel Nolan, who says, "When I first visited Dental Concepts for a teeth whitening procedure, I did not have high expectations. I had already done this procedure at other local dentists, and I had always been disappointed by the result. From the very first moment I walked into their office, I felt welcomed and important. They made sure to understand exactly what I was expecting to achieve from the teeth whitening procedure, and they did a great job translating it into an astonishing result. I am very satisfied, and I would recommend them to anyone interested in a treatment of this kind."

Dental Concept's expertise is not limited to their teeth whitening and cosmetic dentistry service, as they offer a wide variety of services catered towards fulfilling all of the dental care needs that a patient may have. Their services include Implants, Orthodontics, Restorative Dentistry, Preventive Dentistry, and General Dentistry, among many others.

One may contact Dr. Manish Chitnis for more information regarding Dental Concept's cosmetic and dental care services. Information about directions to the dental care centre is also available at the following link:
