

Alexandria Landscape Company Launches New Website

August 20, 2019

August 20, 2019 - PRESSADVANTAGE -

Rockwood Landscape Company, a business based in Alexandria, Minnesota, has announced that they have recently launched their new website. The company provides professional landscaping services for homes in Alexandria and neighboring areas. Their goal is to enhance a home's outdoor living space with quality products that have been built to last for a long time. They use 3D rendered drawings to allow clients to visualize the project with high quality 3D graphics even before starting any construction.

"We're so happy and excited that we have been able to launch our new website. Hopefully, it will allow people to better understand the kinds of services that we can provide," says Mike Hvezda, owner of Rockwood Landscape Company.

He continues, "At Rockwood Landscape Company, we hold ourselves to the highest standards with the services we offer, and in every aspect of the work we do, which is why we provide a 5 Year Warranty on all Hardscapes (exceeding the industry standard of 3 years). We provide a 3D rendering service to give you the opportunity to see your project in high quality 3D graphics before any construction begins. We are dedicated to offering diverse and specialized services tailored to your unique preferences and situation."

Rockwood Landscape Company can provide a number of features for the home, as well as services. These include pavers and flagstone; retaining walls; steps and stairs; fire pits and fireplaces; water features like fountains, pondless waterfalls, and ponds; outdoor kitchens; landscape lighting; lawn edging and maintenance strips; trees, shrubs and perennials; property maintenance; rip rap; and skid loader and mini excavator service.

Meanwhile, the quality of the services provided by the company has been attested to by many positive customer reviews on Google and Facebook. For instance, on Facebook, Mandy B. says, "Many things were exceptional about this crew. Hard working, timely, great communication and willing to go the extra mile. I look forward to having them complete more improvements in the future. Oh, and the landscaping looks great too." Those who want to learn more about these reviews or get some updates regarding the company can check out the Rockwood Landscape social media page.

For pavers, the company uses segmental interlocking concrete pavers because these are the strongest and longest lasting pavement option. They install both standard permeable and non-permeable systems as well as flagstone. With the paver system, different textures and accent colors can be combined in order to create an area that will stand out from other similar systems.

The company also installs single and tiered retaining wall systems, raised patios and planters, and accent and seat walls. By using various accent colors and textures, the retaining wall can be customized to make it unique and stand out from the rest. Just like with other projects, the company can provide a 2D draft or a 3D rendering to allow the client to see how it would look once the project has been finished. These walls are built by the company's NCMA certified installers.

And for front entries to steep lake properties, Rockwood Landscape Company can add steps and stairs to add beauty, safety and value to the property. The steps and stairs can be made from manufactured concrete, natural stone or timber, depending on the client's preference and the property. And for a steep lake property, customized steps and stairs can add value and safety to the property.

For those who love to stay outdoors in the evenings, fire pits and fireplaces can be installed by the company. These will add the warmth and entertainment of fire for the outdoor living space during the evenings. A fire pit can be useful, whether people want to enjoy wood fire cooked meals or just have an outdoor area where family and friends can get together.

And then there are the water features, which have low maintenance and can easily be added to the outdoor living area. For instance, ecosystem ponds offer an all-natural, low-maintenance way of having nature right at the home's outdoor living space. It is a balanced ecosystem made up of fish, rock and gravel, aquatic plants,

beneficial bacteria, circulation system, and filtration system.

Those who need more information about the Alexandria landscaping services can visit the company website or contact them through the telephone or via email.
