

New Website Demonstrating The Unique Ex-701 Knee Braces Launched

July 31, 2015

July 31, 2015 - PRESSADVANTAGE -

EXOUS Bodygear have released their new and unique ex-701 knee braces. Furthermore, they have launched a video that explains the ins and outs of this device and how it should be used, as well as showing the difference that the ex-701 can bring to the market as a whole. To date, the knee brace has received a wealth of positive reviews, and the company expects this to continue.

M Kaur, Brand Manager from EXOUS Bodygear, says, "We are very happy with the US launch and the feedback we have received from customers so far."

The knee brace has a number of key features that make it superior to other similar products on the market today. The most unique feature is that, unlike other knee braces, this model has a 4-way compression designed from the bottom up. The four dedicated straps anchor across the thigh and lower leg and the two individual cross over straps allow the patella tendon to be isolated and tracked for additional support.

The brace also comes with double lateral stabilizers, which allow various knee conditions to be supported. It is also made from 3mm high-grade neoprene, which allows heat to be retained, providing therapeutic

properties and actually healing the knee. As such, it provides flexibility, support and therapy.

One knee support review states that, "As someone who has tried multiple knee products before, Exous trumps them all, other knee braces either feel like they are cutting off the blood circulation or they always slide off and don't fight right. With this new knee braces they offer the perfect ability to make sure it fits nice and snug while being comfortable, now when I go for light jogs I barely notice it's even there and I don't have that aching knee pain after runs anymore."

This review highlights the enhanced comfort features that the knee brace comes with. It uses a jacquard Lycra inner lining, which allows it to be comfortable even with sensitive skin. Furthermore, it has an optional elastic sleeve for extra comfort and ease of fitting. Finally, the 4-way strap allows a gap to exist behind the knee, thereby avoiding common discomfort issues.
