

# TeeHeeCo's Basic Grow Package Now Available

*August 21, 2019*

August 21, 2019 - PRESSADVANTAGE -

TeeHeeCo is proud to announce the availability of a basic grow package for soil. The package is priced at \$1,250, and includes a wide variety of tools, equipment, and ingredients that are ideally suited for beginners and first-time growers.

The Basic Grow Package is easy to set up, even for those that have no prior experience with gardening and planting. Except for seeds and soil, the kit contains everything growers need to provide plants with a healthy growing environment at home.

All the items in the kit are chosen for their usefulness and ease of use for home gardening. Each is essential for the growing process and is designed to work with the other items in the grow package.

The Basic Grow Package is designed specifically for indoor gardens. Using the items in the kit, budding gardeners can grow as many as six plants. The package includes a clip-on fan, an inline fan, a dual-outlet digital timer, active air ducting, two air stone cylinders, six saucers, a measuring shot glass, and an air pump. Also included in the package are a charcoal filter, a dirt pot, a CO2 bag, and an LED light.

The included LED light, the K3 Series L600, is specially selected for its energy efficiency. An easy to use LED light, it is ideally suited for the needs of first-time growers.

The Basic Grow Package also includes a selection of nutrients that help ensure successful grows, even for those with minimal growing experience. Manufactured by Nectar of the Gods, the "Grow," "Bloom," and "Micro" nutrients are intended for use according to a specific feeding schedule.

The Basic Grow Package is only one of the many growing solutions that TeeHeeCo provides. The company maintains an online store, as well as a physical store in Columbus, Ohio.
