# The Key Guys Offer Repair And Replacement Services For Broken Car Keys

*August 28, 2019*

MINNEAPOLIS, MN - August 28, 2019 -
Minneapolis, MN based The Key Guys, a locksmith company that specializes in car keys, is pleased to offer their services to customers of all kinds in the St. Paul and Minneapolis area. Since their launch in 1988, The Key Guys have worked with local auto dealerships, car rental agencies, service stations, and private drivers. This diverse customer base has given The Key Guys employees the expertise and knowledge to service vehicles of most makes and models.

Notably, car rental agencies, auto dealerships, and the general public rely on The Key Guys for a wide range of emergency services. The locksmith company is able to quickly remove broken car keys from locks, fix broken car keys, program new key fobs, cut new car keys, replace lost car keys, troubleshoot any ignition issues, and even program transponder keys. With such a large list of available services, The Key Guys are able to help most drivers get back on the road with minimal hassle.

When most drivers realize that they have a problem with their car key, their ignition, or any of the locks on the car, immediately start thinking about the towing and service costs they are about to incur, as well as the amount of time they will have to spend at their car dealership waiting for a solution. Fortunately for customers in range of their services, The Key Guys offer a wide variety of 24 hour emergency locksmith services. This aspect of the company is perfect for individuals with busy lifestyles, or even for those who simply need new car keys in a pinch.

Not only do The Key Guys provide services at any time of day, 365 days a year, but the locksmith company will also send employees to the location where the locked car currently is. This practice allows the company?s customers to receive service almost immediately after making the initial call?all without incurring additional towing costs to get their car to a service station. ?I could not be more impressed by this company,? says former customer Katie O. ?The Key Guys had impeccable service and incredible customer service, which is crazy rare for me to admit. My purse got stolen, along with my only car key fob. The company worked with my schedule, and showed up at 8 am. The employees were super friendly, very quick, and they charged only half the price that towing my car to the dealership to have them replace the key would have cost

me. I?m so happy I called them!?

One of The Key Guys? most popular services is their ability to fix, replace, and reprogram transponder keys. A feature of many modern cars, these are smart keys that communicate with the vehicle when put into the ignition. Even if the key fits, a car will not turn on if it does not recognize the serial number programmed into both the key and the car. While this is a popular key among drivers as it provides additional security measures, it also makes it impossible to start the car when a transponder key runs out of batteries or becomes broken in some way. Fortunately, The Key Guys utilize equipment identical to the kind they use in car dealerships to program car keys.

Since a transponder key is more intricate than a regular car key, a faulty transponder key will cost a car owner a little bit more than usual. In order to cut down on prices for drivers overall, The Key Guys proudly state that they can service a transponder key at a fraction of the price that a car dealership offers. ?I highly recommend this company,? Drew H. says. ?The employee who helped me was professional, friendly, and confident. I lost my key and remote fob hybrid for my car and I was devastated. The Key Guys employee was able to fully replace it, change the frequency on my car so they old key wouldn?t work, and even gave me a spare stand-alone key in case something like this happened again! I thought I would have to take my car into the dealership, but instead The Key Guys came to me and provided excellent services for a very reasonable price.?

With their ability to repair car keys of any kind, The Key Guys are a great choice for individuals or companies who need auto locksmith services at any time of the day or night. Those who are interested in the locksmith company?s services may visit their website or connect with the company through their social media platforms for more information on their services and pricing.
