

Haselden Construction Breaks Ground on Holy Family High School - School Expansion Will Allow for More Students and New Robotics and Engineering Programs

August 27, 2019

August 27, 2019 - PRESSADVANTAGE -

Haselden Construction recently broke ground on the expansion of Holy Family High School in Broomfield, Colo. The 34,000 square foot expansion will include eight new classrooms, a fitness center and auxiliary gym with expanded locker rooms, and an enlarged cafeteria, allowing the school to grow from 690 students to 800 students.

"As the current stewards of Holy Family, it's our obligation to ensure its future and pass it on to the next generation," Holy Family Principal Matthew Hauptly said as he addressed the Holy Family board of trustees, students, and faculty; members of the Archdiocese of Denver and Catholic Foundation; and community leaders during the ground breaking ceremony.

The expansion, expected to be completed in time for the 2019-2020 school year, will allow Holy Family to deepen its science, technology, engineering and math (STEM) curriculum as well as offer robotics courses. The new gymnasium and fitness center will enable students and sports teams to practice during school hours, rather than before or after school.

"With some elbow grease, tenacity, and a lot of prayer, we are eager to start a new chapter for our institution. We look forward to offering our students a deeper curriculum, more STEM classes, a spacious commons, and more gym time, as well as the ability to say "yes" to parents who want a Catholic education for their kids," added Hauptly.

Haselden Construction has a skilled education division that has completed numerous K-12 and higher education projects, including ground-up new school construction, summer remodels with rigorous completion timelines, and renovations and expansions during the school year that revolve around students' safety and schedules. The company uses a proprietary Methods and Procedure communication tool to ensure school administrators and teachers are always aware and informed of construction activities and how it will impact

students, staff, and the learning experience.

“Our relationship with Holy Family extends back almost a decade to when we first completed a small structural remodel for the campus, and it’s continued to grow over the years,” said Jarrod Fugate, vice president for Haselden Construction. “We’re excited to be a part of this next phase of growth for Holy Family and to be able to provide them with the facilities needed to grow their campus and further serve their current and potential students and families, as well as the community.”

About Haselden Construction

Haselden Construction is celebrating over 45 years in business. Founded in Colorado in 1973, Haselden delivers sustainable projects throughout the Western United States. Named a Denver Post Top Workplace in 2018, 2017, and 2016, and ranked number 13 on CoBiz Magazine’s 2018 Top Family-Owned Companies list, Haselden is deeply rooted in family traditions, prides itself on being A Great Builder, and is dedicated to fulfilling its customers’ needs completely. The Denver construction company builds a diverse range of project types including office, education, healthcare, mountain resort, gaming, multi-family residential, and municipal facilities.
