Fast Eddys Keys Express Publishes Helpful Content On The Best Door Locksets

September 07, 2019

September 07, 2019 -
Fast Eddys Keys Express, a locksmith service based in Minneapolis, Minnesota, has announced that they have published helpful content, such as text and videos, on how homeowners and other property owners can find the best door locks. The locksmith service installs or repairs hardware as well as rekeys locks. Fast Eddy explains that there is a wide range of door lock sets that people can choose from and they are ready to help people make the right choices.

Edward Mann, owner of Fast Eddys Keys Express, says, ?Remember: The strongest door is only as good as its lock. And there are hundreds of choices to choose from. We can assess your particular circumstances and help you hone in on your best choices. With my help you will have a better understanding of the options that you should consider before acquiring door locksets.?

Fast Eddy adds, ?When selecting door handles and locks for your doors, you want to also pay attention to the strike plates. There are inexpensive ones, and there are secure ones. We recommend that you seriously consider upgrading to the more secure strike plates, and as simple as it sounds, the longer screws.?

Fast Eddy advises homeowners and property owners that they need to change their locks fast during certain situations because the window of opportunity to prevent a crime is during the first 48 hours. Such opportunities arise when an employee resigns from a company or business, or the maid has recently left from a household.

Unfortunately, duplicate keys can easily be made unless they are high security locks like those by Schlage Primus. According to Fast Eddy, the Primus keys that he provides for this customers are not sold to anyone but him. This ensures that there would be no duplication of the keys without the owner?s permission. People are advised to avoid the locks and keys that can be purchased from hardware stores.

And there are a variety of keys that are available, from the master key system to the keyless entry locks. A master key system may be the choice of the owners of a property with a large number of doors and rooms. The master key system offers the primary benefit of allowing the use of as few keys as possible to provide access to all of the rooms in the home or the establishment. This is particularly advantageous for office buildings. Just a few keys will be needed for the whole building. One master key is for the owner and the security guards as it will allow access to all areas. Other keys may be provided based on the areas that certain groups of people can access.

Meanwhile, the keyless entry system will offer a security system that will not require any mechanical keys. Each key is password protected and the primary advantage is that the password can be changed anytime. This is commonly used in hotels although it can also be used in other establishments.

The locksmith service is a family-owned and operated company that has been offering its services for over 30 years. Edward Mann was the one who established the business in 1985. It was not yet Fast Eddys Keys Express at that time because he had not yet earned his nickname ?Fast Eddy?.

It was some years later that Johnny Gilbert, a columnist for the Minneapolis Star and Tribune, happened to lock his keys inside his car. And it was Eddy whom he called for help. Eddy was able to unlock it so fast that Johnny was so amazed, he started calling him ?Fast Eddy?. Johnny, being a columnist, spread the news regarding Fast Eddy?s ability, and this vastly increased his number of customers. It was then that he decided to change his business? name to Fast Eddys Keys Express.

Fast Eddy says, ?For those who say they are looking for the best locksmith near me, call us. Our business hours are from 7:30 am to 7:00 pm, from Monday to Sunday.?
