Locbit Improves Customer Support with Innovative Intern Program

July 28, 2015

July 28, 2015 -

San Diego, CA based company has announced improved customer support and product delivery by introducing an innovative intern program.

The intern program is designed to allow students to gain hands on experience in the new industry of the internet-of-things, and in business automation.

Locbit California State University San Marcos, Computer Science Intern, Brandon Herbert, says that, "Locbit is a great learning environment where I get to work with cutting edge IoT technologies and provides a unique insight on how the industry is progressing.?

John Yates, Locbit VP of Engineering believes that, ?We?re very lucky to have found such talented interns. From day one they showed motivation and skill and we're extremely glad to have them as part of the team. What?s amazing is how much we have learned from them.?

Locbit?s interns learn software development, marketing, and finance with more areas opening as the company continues to grow.

The company?s contact information and list of team members can be found on their website. Here, those interested in taking advantage of Locbit?s services can make inquiries, read more about how analytics work to streamline other businesses, and view case studies on the efficiency of this automation system. The company has made it clear that they hope to assist each client by improving operations, solving risk management, and reducing energy costs.
