

Roy Utah Dryer Vent Cleaning Services Offered

September 11, 2019

September 11, 2019 - PRESSADVANTAGE -

All Clean Air Duct Cleaning, a business based in Centerville, Utah, has announced that they are now offering Roy Utah dryer vent cleaning services. They want to remind homeowners that simply cleaning the lint after using the clothes dryer will not be enough to keep it working properly. This is because while clothes are drying, the lint will accumulate in various parts and crevices of the system that are difficult to reach. This accumulation of lint will reduce air flow and reduce the efficiency of the dryer while increasing the risk of accidents.

Daryl Olsen, owner of All Clean Air Duct Cleaning, says, "Getting professional assistance for dryer vent cleaning will boost efficiency and help you reduce the risk of serious accidents. Our team will offer high quality, professional duct cleaning services. Instead of attempting to handle the task on your own, you should definitely opt for a professional guarantee of quality execution."

He adds, "It's easy to figure out whether your dryer needs to be professionally cleaned. One of the most common signs of a problem is clothes that take forever to dry. Even if you keep them inside for a very long period of time, it's possible for the clothes to dry only partially."

Other possible indications of a dryer venting problem include clothes feeling very hot after the end of the

drying cycle; a burnt or stale smell; unusual heating of the dryer itself; the feeling that the laundry room is particularly humid; and the hood flap of the vent only partially opening. It may also be the case that the duct flap will only partially open or may not open at all. This indicates that the airflow is limited and the accumulation of lint is already substantial.

Getting the services of professional dry vent cleaners provides a number of benefits. First, it will enhance fire safety. Almost 15,500 fires are caused by a malfunctioning dryer in the US each year, resulting into more than 430 injuries and 34 deaths. Second, regular and proper cleaning of the dryer will allow the dryer to function efficiently, resulting in the reduction of energy bills. Studies have shown that clogged dryer vents increase energy costs by 18 to 25 dollars each month because they increase the amount of time it will take for the clothes to be properly dried.

Third, professional dryer vent cleaning will decrease the risk of mold formation because there is no moisture left hanging in the air. When the dryer vent is not working properly, a lot of moisture is left and this is conducive to mold growth. Finally, a professionally cleaned dryer vent will increase the lifespan of the dryer and the clothes. With a clogged dryer vent, there is more heat inside the dryer, exposing the clothes to too much heat and damaging the fibers.

Meanwhile, aside from dryer vent cleaning, the company also offers air duct cleaning services. They want to point out that regular air duct cleaning is essential because there are hundreds of square feet of surface area in the air ducts where dirt, dust, hair, pollen, spider webs, dust mites, dead insects, and other impurities and allergens can accumulate. There may even be mold growth. Do-it-yourself air duct cleaning is not recommended because it requires professional training and special equipment. Without professional help, the dust and other particles may scatter and get into the furniture and other parts of the home.

They also offer electrostatic furnace filters, which are necessary because they help in keeping the air conditioning equipment's coils and heating elements from getting coated with dust. The dirt that accumulate on those parts of the A/C system often result into cooling and heating system failures. These filters also help in preventing common allergies, are environmentally friendly, improve housekeeping, and are effortless to maintain.

All Clean Air Duct Cleaning has other service areas aside from Ogden and Roy, Utah. These include Layton, Lehi, Kaysville, Sandy, Park City, Salt Lake City, and Provo. Those who are interested in the dryer vent cleaning and air duct cleaning services from All Clean Air Duct Cleaning can check out the company website or contact them through the phone or via email.
