

## **Naperville Electrician Fail Safe Electric Company Celebrates Positive New Customer Review**

*September 11, 2019*

September 11, 2019 - PRESSADVANTAGE -

Fail Safe Electric Company, an electrician based in Naperville, Illinois, is pleased to announce that they have received a glowing review from one of their long-time customers on the Google platform. The company was started in 2009 by Louis Lopez, a career electrician who noticed the lack of high quality services in the field and wanted to fill the gap by offering inexpensive electrical solutions and services.

In the review, the customer Bill Brennan, says, "We are having our third home electrical project done by Fail Safe Electric and are extremely pleased with the high quality of work performed. Each employee has been competent in their work and very respectful to us. I can honestly say they are prime examples of a contractor that delivers quality, consistency, and value every time. I am just awful in handling electricity so I play it safe and call Fail Safe Electrical Services."

In response to the review, Lopez says, "It is always a pleasure to see a satisfied customer. We believe in putting our best foot forward when it comes to ensuring the community always has access to electricity. Whenever someone hires us, we give our absolute best service and we always treat people with the respect they deserve. It truly warms my heart to see our work recognized."

Separately, Lopez adds, "Electricity keeps the modern world running, it powers all of the technology that we have come to depend upon. When your power goes out, you're going to need someone who can come out and make repairs quickly. That means you need Fail Safe Electric Company, of the greater Naperville area. Our name isn't just for show—we really are the Fail Safe you need when your power is out, and we are proud to serve Naperville, Bolingbrook, Woodridge, as well as the surrounding areas."

The Fail Safe Electric Company employs licensed electricians who have many years of experience in the field. The technicians employed by the company all follow a Code of Values that ensures that they respect the customers' commercial and residential premises as well as the occupants in the building. Their experts also maintain a keen attention to the smallest details, ensuring that their work is carried out according to the most stringent safety and quality standards in the industry. The company asserts that they can handle any problem that a homeowner might be having, whether it is a simple job like installing ceiling fans or a more significant project like rewiring an entire home. They offer a wide range of services that run the gamut from simple installations and lighting to electrical safety measures.

Lopez says, "We put our customers first. It is part of our code of values. Whatever work we take on, we continuously strive to earn customer loyalty by doing our best to understand and appreciate the needs of our customers and solve their problems using the most appropriate solutions. This is what sets us apart from the rest."

The company's dedication to their customers is made evident by their reviews on Google. In addition to Bill Brennan's recent review, there are 43 other reviews, and each of them has given the company a five-star rating. A Google review from another customer, J. K., reads, "Louie was extremely knowledgeable. I had two other bids before he came out; he gave a thorough explanation of what he needed to troubleshoot and had my electrical systems up and running in no time. Fail Safe really is the safest bet! Thanks again to Costello and Louie!"

Another customer, Jack Shafton, says in his Google review, "If you need a highly skilled electrician who is dependable, professional, and does high-quality work, Lou is your guy. He's done multiple projects around the house for me, his rates are realistic, and his work is top notch. Couldn't recommend him more."
