
One Source Communications Opens Two New Centers To Meet The Rising Demand For Its Managed Security Services

September 06, 2019

September 06, 2019 -

Raleigh, NC and Greenville, N.C. ? To meet the increasing demand for Managed Security Services (MSS), One Source Communications (One Source) announces the opening of two new centers ?an Engineering Center and a Security Operations Center (SOC) ? in downtown Raleigh, North Carolina, to expand its cybersecurity solutions for small and mid-sized enterprises. To support this growth, One Source has also hired 30 additional staff members in the last few months from the Research Triangle and expects it will follow a similar job growth trajectory in the near future. One Source has two other SOCs and SOC labs located in Greenville, North Carolina and Portland, Oregon.

?In today?s highly-digitized, networked world, cyberattacks and data breaches pose real dangers and costly risks for businesses of all sizes,? says Steve Cobb, senior technology and security fellow with One Source. ?Cybersecurity threats and compliance laws, such as the General Data Protection Regulation (GDPR), also increase companies? administrative burdens and challenge them to dedicate talent, training and other

monetary resources needed to provide adequate levels of quality in-house support. These new centers, coupled with our existing SOCs and SOC labs, allow us to enhance our 24/7/365 integrated security services and protect our clients with Fortune 100 solutions in a highly-volatile threat landscape.?

Since adding Managed Security Services to complement its other offerings ? Communications Lifecycle Management, Managed Mobility Services, Managed IT Services, and Field Services ? One Source provides a full-spectrum of end-to-end monitoring, detection, investigation, hunting, response and resolution security services. These include around-the-clock monitoring and protection against security threats such as data theft, malware, intrusion of firewalls, phishing and other malicious activities.

One Source is the first and only certified mid-market firm to partner with FireEye?, the most prestigious global intelligence-led security companies which safeguards Fortune 50 firms, government security agencies and nation-states. One Source also partners with Cofense, the leading provider of human-driven phishing defense solutions, to provide fully managed security awareness services. These significant partnerships allow One Source clients to receive the comprehensive benefits of full enterprise-grade security solutions.

Both centers are located in a historical building in downtown Raleigh, which was home to the first telephone exchange in North Carolina, and at one point, housed the oldest bank vault in the Southeastern U.S.

ABOUT ONE SOURCE COMMUNICATIONS

One Source Communications is an award-winning firm which helps businesses simplify a complex technology world. One Source is the leading provider of Communications Lifecycle Management (CLM) and Managed Mobility Services (MMS) in North America for mid-market enterprises. The company serves over one million assets and devices for more than 1,000 customers from over 20,000 business locations, as well as operates a 24/7/365 help desk. Headquartered in Greenville, North Carolina, the company has a proven track record for generating triple-digit Returns on Investments (ROIs) through contract negotiation, portfolio optimization, and ongoing telecom expense management. One Source?s clients successfully self-funded One Source?s Managed Security Services and Managed IT Services through savings generated from CLM and MMS. Learn more at https://www.onesource.net.
