

Empire Towing Company Starts Expanded Towing Service in Los Angeles, CA

September 06, 2019

September 06, 2019 - PRESSADVANTAGE -

Empire Towing is set to re-launch its towing service in Los Angeles, CA after years of serving the City of Angels. The company has been providing 24-hour towing service in the largest city on the west coast of North America for over 15 years. The re-launching of their business operations is a renewal of their commitment to maintaining top rate tow truck services and roadside assistance for Angelenos. For more information about the company, kindly click here: <http://gmbp.in/u/5d726f5310644>.

Macsen Fleming, the representative for Empire Towing says, "Towing is a vital transport service in the city of Los Angeles because it is one of the most congested cities in the US with over a hundred peak hours of vehicles in congestion. There is a high incidence of roadside problems because there are many motorists on the road. Empire Towing helps in easing normal traffic flows by providing fast assistance to stalled vehicles. Our company has been providing motorists with speedy towing and roadside service without any worry."

The company's towing operations are open 24/7 and their principal services include emergency towing service, flat tire changes, locksmith services, jumpstart services, long-distance towing, and fuel solutions among others. Empire Towing's services are steadfast and consistent especially in emergency instances

when time is precious. The tow rescue team arrives at the customer location within 30 minutes. Regardless of what emergency a customer needs as long as one is in and around the LA area, Empire Towing can provide rapid response and swift assistance.

Fleming adds, "Our tow mechanics are well trained and experienced to tackle any roadside problem. They can handle any kind of car model, year or brand. They can also handle towing of any type of vehicle." The company has experience handling sedans, coupes, sports cars, electric cars, hybrid cars, 4x4 trucks, vans, and RVs. All the company's tow trucks are armed with state of the art winching equipment that can accommodate all types of vehicles including motorcycles. The workers are licensed experts thereby ensuring fast but safe towing of customer's properties. "We take care of our customer's vehicles like our own," adds Fleming.

Jeffrey Rodriguez, a recent customer from Sherman Oaks attests, "Empire's tow operators work fast but cautious. They won't knock you off with surprising charges. After a quick but thorough assessment, they ascertained that my civic's battery needed replacement so they did not take the trouble of reviving it. They towed my car to the nearest battery shop and I was charged just for towing. Some tow workers would pretend to resuscitate dead batteries so they can charge additional jumpstart services on the bill. Aside from dependable service, their workers are trustworthy."

Roadside misfortunes and car problems can occur anytime and anywhere. Some things happen in life that is beyond our control such as a flat tire, a drained battery or an empty gas tank. The company makes its services available 24-7 so that motorists can count on someone in times of dire need. Moreover, the company also expanded its services to as many neighbourhoods as they could. Among them included Nevin, Vernon, Jefferson, Maywood, Wildasin, Montrose and a whole lot more. A comprehensive list of the company's service area can be found in their here: <http://gmbp.in/u/5d726edf9c074>.

Fleming further adds, "Empire Towing is delighted to announce the launch of its new website, which coincides with our expanded towing operations." The new website is reflective of the company's mission to deliver towing solutions to customers beyond standard expectations. It is fully responsive to mobile devices to allow customers to reach and contact the company more conveniently. The new Empire Towing website can be accessed here: <https://www.empiretowinginc.com>.
