

Royal Denture Clinic

Calgary Denture Clinic "Royal Denture Clinic" Now Offers Denture Relief Gel and Stain Remover

September 09, 2019

September 09, 2019 - PRESSADVANTAGE -

The clinic aims to teach denture wearers how to live comfortably with dentures and prolong its life.

Dentures are a removable tool designed to contribute to quality of life when teeth are missing. According to the Canadian Dental Association, the percentage of adults with no natural teeth has decreased significantly. There are still 6.4% who are edentulous. These denture wearers may experience irritation of gums and mouth as well as staining of dentures.

Royal Denture Clinic is offering ProRelief Dental Gel and Nudent in their Calgary office. The gel will help soothe and heal sore gums or dry mouth. Nudent is a professional denture stain remover. The gel and stain remover, along with a good oral routine developed by Royal Denture Clinic, will improve the denture experience including the preservation of a good fitting denture.

Royal Denture Clinic encourages daily cleaning of the denture. They sell a professional stain remover called Nudent that their patients have said works well in getting rid of stains on dentures. Clean dentures contribute to a healthier mouth. This along with eating a varied diet and using back teeth to chew, preserve the jaw

structure and function by distributing chewing to both sides of the denture.

If patients are experiencing irritating, sore, or sensitive gums, Royal Denture Clinic recommends ProRelief Dental Gel. Besides allowing the gums some time to rest, this gel works to soothe the gums without stinging or burning. Regular visits to the dentist to have remaining teeth cleaned and maintained will help keep the whole mouth healthy.

Royal Denture Clinic recommends yearly check ups for any damage. Cracks, chips, loose teeth and change in fit are all signs the denture may need maintenance. ?Some people feel very apprehensive when they have to get dentures,? says Jill Schultz, Office Manager of Royal Denture Clinic. ? We can support your journey each step of the way.?

Royal Denture Clinic is located in Brentwood Village Mall in Calgary, Alberta. They are a lab equipped to create a custom fitted dental appliance by their licensed denturist. They design complete, partial and implant dentures, as well as Immediate/Surgical dentures. A denturist is available for follow up visits and general support in getting used to the dentures. Adjustments and repairs are available to their patients and to others who have had their dentures made elsewhere. For more information, or to reach Royal Denture Clinic, please go to: <https://royaldenture.com/> or call (403) 338-1014.

X

At Royal Denture Clinic, we actually have two labs! We have a large, lively lab where stone is flying, acrylics are curing, materials are put under intense pressure and metals and plastics are bonding to each other.
