'Aarav was diagnosed with Hepatoblastoma (liver cancer) just after his second birthday. It is a very rare condition which affects only one in a million children. He fought very bravely with this disease for almost 15 months (with two major liver surgeries and several rounds of chemotherapy), but unfortunately he left us on 12th Dec 2012.'

'To keep his memories forever in the hearts of people we decided to set up a charity so that we can support other young children who are sadly on the same journey or who are fighting with life-threatening conditions,' said Sunita Asal, Mother of Aarav and co-founder of Unique Visa Services.
