Indianapolis SEO Agency Welcomes New Clients

September 26, 2019

September 26, 2019 -
Cincinnati, OH based IM Consultant Services is pleased to inform the wider community of Indianapolis business owners that the company is now taking on new clients for their industry-leading SEO services. The veteran SEO provider has been analyzing the digital landscape and improving the online reach of their clients for more than 20 years.

SEO, or Search Engine Optimization, enables a business to rise higher in search engine rankings for associated search terms through a multitude of adjustments in the business? online presence. These include, but are not limited to, curating and developing content, promoting ads, and even updating the code and useability of their official websites. Notably, IM Consultant Services makes it their mission to study to offer all these services and more, given that they are a full-service Indianapolis SEO provider.

According to Mike Marko of IM Consultant Services, each new client is offered an open Alignment and Planning period that enables both parties to come to terms with the client?s goals for their business. ?This step is crucial, and we insist on having this meeting instead of simply diving into the standard things we can do for you,? says Marko. ?We have known for years that our services are best utilized when we understand exactly what you?re looking for and where your business is heading?and the same is true if you understand our services better.? He explains that IM Consultant Services maintains a strict policy of transparency with

their clients, so every aspect of their plans and their abilities is laid out for the client to examine.

?We are extremely proud of what we can do,? says Marko, ?and it?s easy to point at simple statistics from our history, like the fact that we have been able to more than double our clients? online visibility on average, but that will mean little to any business owner who wants to conscientiously take their company forward. Our first step is always to make sure that we know what your objectives are that you know exactly how we aim to achieve that.? This introductory session, says Marko, allows the agency to help their client determine their Key Performance Indicators, or KPIs. He adds, ?Those KPIs will then be our foundation to start planning a strategy that contains projections and timelines to help your business achieve its goals.? Learn more here: SEO Company Indiana.

The next step is where the agency puts their technical expertise to work. ?At any given point,? says Marko, ?your website is out of date in some way. This is also true for our existing clients, and it?s why we work so hard to figure out what needs to be updated so that they don?t lose their rankings.? To address this, IM Consultant Services performs multiple tasks that include speeding up the client?s website, ensuring that it is compatible with mobile devices, improving front and back-end security, and more.

Marko notes that, ?It?s crucial that we always test ourselves instead of getting complacent. The standards of today will be history tomorrow, so we always need to learn and relearn what works best for our clients. Our knowledge base is comprehensive, but our true strength is our ability to add to it in an ongoing fashion.? The agency is able to wield this ability with great effectiveness for their clients in other aspects as well, especially by carrying out opportunity research. This service gives clients insight into what their customer base is typing on search engines like Google, in turn giving them clues on what they need to generate leads for their business. Marko asserts that acting on this information has the secondary, simultaneous advantage of improving the search ranking of the business in question.

Separately, he clarifies, ?Clients should be aware that, while there are multiple search engines, we usually give specific attention to the Google platform. This is because it has the greatest share of all searches carried out on such platforms. For all intents and purposes, our work applies almost exclusively to Google for this reason.?

Clients who wish to learn more about the agency and their services may contact Mike Marko of IM Consultant Services to learn more. They may also request a free consultation, during which the agency will explain how their services can boost the company?s online visibility and turn website visitors into paying customers.
