IM Consultant Services Publishes In-Depth Review Of Elevacity?s Smart Coffee And Other Nutritional Products

September 19, 2019

September 19, 2019 -
Cincinnati, Ohio based IM Consultant Services (IMCS) recently published an in-depth review of Elevacity?s wide range of health products and body supplements, which include the new Elevate Smart Coffee. Their review also focuses on a number of Elevacity?s nutritional supplements and discussed both the advantages and drawbacks of using said products.

As explained on the IMCS website, Elevacity is a family of products that promises to, ?elevate one?s health, wealth, and happiness through patented and powerful nutritional consumer products.? The company is one of the newer multi-level marketing (MLM) companies in the market, specializing in health and wellness supplements. They mainly focus on offering nutritional beverages and skincare products, combined with virtual success training and a rewards program for their members.

As noted in the IMCS review, Elevacity claims that their products may provide a number of nutritional benefits and enhance one?s cognitive function; mainly executive functions, memory, creativity, or motivation in healthy individuals. Elevate Coffee, for example, is said to increase natural energy, mental clarity, alertness,

focus, and concentration. Most of their products are also said to be rich in antioxidants, and have the ability to reinforce healthy metabolic activity, eliminate free radicals, promote better sleep quality, enhance weight loss efforts, and improve skin tone and color.

Elevacity asserts that their products were developed by a team of doctors, pharmacists, chemists, naturopaths, food scientists, and nutrition experts with over 50 years of combined experience. The company also points out that their products are manufactured in the US, adhering to only the highest standards. Their products are made from non-addictive, all-natural ingredients with no additives and fillers. Some of the most popular Elevacity products include Dose (Elevate and XanthoMax), Elevate Smart Coffee, Choclevate, KetoCre, Elevacity Extreme Energy Patch, Elevacity Sound Sleep Patch, Elevacity Hangover Defense Patch, Pure 2.0, Timeless Skincare, and Elier Mud.

However, IMCS is generally skeptical of some of Elevacity?s claims. Mike Marko from IMCS, said, ?We like Elevacity?s use of some well-researched ingredients, but there are just too many negatives for us to be excited about their products. The general public should take note that there is very limited information about the company and elevate smart coffee reviews are also few and far between. We are also not that convinced of the claims because there is no research to support the effectiveness of their formula. Furthermore, we have a number of concerns about Elevacity?s MLM opportunity.? He further states that while there are benefits to be found in using Elevacity products, there are also alternatives in the market that are more affordable, backed-up by research, and clinically-proven to be effective.

?One of the products we like the most is Burn TS. The formula contains four clinically-tested ingredients; namely caffeine, green tea, ChromeMate, and Meratrim. Research shows that these ingredients help boost energy levels and curb hunger,? Marko says. He states that the team supporting Burn TS offers a 2-Week Sample as a sign of confidence in their supplement.

According to Marko, Burn TS is made from scientifically backed and tested ingredients but what really sets it apart is the service behind the product. In fact, Meratrim, the main ingredient in Burn TS, has been shown in three randomized, double-blind, placebo-controlled studies to significantly decrease body weight and reduce waist and hip circumferences when combined with diet and exercise.

In addition, ChromeMate, an ingredient in Burn TS, has been shown in clinical research may help to support healthy blood sugar levels, cholesterol levels, and weight management. Green Tea Extract in Burn TS, examined in numerous studies, including one published in the American Journal of Clinical Nutrition, also results in sustainable weight loss when combined with a healthy diet and exercise. Furthermore, Marko also asserts that Burn TS has helped numerous customers successfully continue down their weight loss path with the tried and true advice and guidance from Burn TS advisors who have also gone through weight loss journeys of their own.

More information about Elevacity and Burn TS products can be found in the published review on the IMCS website. Interested parties may also send an email inquiry or call their office number to speak with Mike Marko from IMCS. Furthermore, Marko encourages all interested parties to connect with IMCS through their official social media pages to stay up to date with their latest news and important announcements.
