Energio Slim Portable Power Bank Charger Achieves 200 Reviews On Amazon

August 04, 2015

August 04, 2015 -
The Energio SLIM portable power bank charger reached a milestone of 200 positive reviews on Amazon for July, 2015. Patrick Loh of Energio released a statement about the achievement:

"We're thrilled that so many customers have found our charger, and our customer service, to be worthy of such praise. We strive to provide the best products and service to our customers, and they've rewarded us significantly for that effort."

The portable battery charger is encased in silver aluminum, which makes it strong and durable. It is a slim and compact backup battery charger that will fit easily into most pockets. The Energio SLIM features a micro-USB charging cable that is built into the charger. When not in use, the cable can be tucked in to the top of the charger, keeping it out of sight, and ensuring that it does not become tangled.

"I needed an Android portable charger for my phone," says an Amazon customer. "This device holds more than a full charge and it recharges quickly. You can even check how much power it has by just pressing the side button, which is really handy. It's the perfect portable charger for travel."

The charger has a bulit-in software that regulates the temperature and voltage to provide the fastest charge possible and in the safest way possible. The maximum output of 5V/1.5A provides more charge than other similar portable charges.

It features a 3850mAh battery, which is constructed of high grade lithium polymer, and offers 500 charge cycles overall. The charger is also backed by Energio's full one year warranty.

With its micro-USB charging cable, the Energio SLIM is perfect for Android phone users. It also comes with a lightning adapter that enables it to charge iPhones 5 and 6.

Reviews for the charger began posting in January, and have been steadily growing since. The charger currently has a 4.5 star rating, with more than 200 reviews to date. "We'll continue to provide excellent customer service and products that our customers want and need," says Loh. "We hope to hit our next Amazon review milestone very soon as more customers join our loyal fan base."
