

Phoenix Az's Landscape Rock Company Offers A Wide Variety Of Decorative Rocks

September 23, 2019

September 23, 2019 -

Arizona based Rock4Less AZ is pleased to announce that they are offering residents of Peoria and the surrounding areas a wide variety of landscape and decorative rocks. The stone supplier also highlights that they offer some of the most popular rocks for hardscaping, including Madison Gold, Apache Pink, Arizona Beige, Sedona Red, Table Masa Brown, and more.

As noted on the company's website, Rock4Less AZ is an established Arizona decorative rock supplier of stones, gravel, river rocks, sand, and topsoil mixes at discount prices. They also carry other products, including fill dirt, pea gravel, rip rap, boulders, and mulch.

"We are a family-owned business that goes the extra mile to satisfy our customers. We also have the tools, equipment, and manpower to accommodate any type of project regardless of its scale. At times, we even accept rush orders and deliver the same day, or within a day, of order placement," says Santiago Meza from Rock4Less AZ. He also states that the company delivers to the greater Arizona area, including Apache Junction, Ahwatukee, Anthem, Avondale, Buckeye, Carefree, Cave Creek, and so on. A full list of the locations that the company delivers to can be found on their website.

Meza explains that, when it comes to landscape and hardscape rocks, homeowners should do their research and learn the basics about rocks in general. He continues that decorative rocks are mainly divided into two categories; namely, small rocks and big rocks. Small rocks are composed of river rock, pea gravel, lava rock, and chipped rock. River rocks are pulled from the river and they are usually smooth or matte in texture, and are a few inches in diameter. Pea gravel, also referred to as pebbles, are a bit smaller but are also similar to river rocks. They are smooth and often come in multiple colors. Lava rocks, on the other hand, are chipped from solidified lava rocks and are popular due to their texture and color. Finally, chipped rocks, also known as gravel, are often used in minimalist and contemporary hardscaping due to their grayish-white color that blends well with all kinds of landscape themes or designs.

On the other hand, big rocks are usually categorized as boulders and cobblestones. Boulders are the biggest type of decorative rocks, and are often used as either centerpieces or accents in a space, while cobblestones are usually rounded and uniform in size, a trait that makes them more aesthetically pleasing to the eye.

Using natural stone in your front yard can significantly add depth and texture to your home's design. Choosing the perfect decorative stones is not an easy task and consulting with a professional, like the ones at Rock4Less AZ, is highly recommended. Decorative rocks come in all shapes, colors, and sizes, and a trusted stone supplier can give proper advice on which type of rock is most suitable for your needs and requirements," says Meza.

Rock4Less AZ offers some of the most affordable landscape rock prices Phoenix residents can avail themselves of. Their quality products and excellent customer service are also attested by many of their previous clients. Notably, they boast an average review score of 4.6/5.0 on the Google review platform.

One of their customers, Josh Skehan, says, "From the moment I called, to the moment Junior Meza followed up after the delivery, I had a fabulous experience with Rock4Less. I got exactly what I ordered (30 tons of Phx Brown) and they were flexible and on time with the delivery. From one business owner to another, I'd like to thank Junior Meza and Rock4Less for their professionalism, great product, and excellent customer service."

Meanwhile, A. Castro, in a Google review, said, "These guys are awesome, honest, and reliable. I called about some rock they had advertised for a great deal. Junior Meza was so nice and professional. They had the rock delivered the next morning and I couldn't have asked for an easier transaction. I called 4 or 5 places before him and was just put off by the companies. Thankfully, the customer service at Rock4Less is top-notch."

More information can be found on the company's website. Interested parties may also send an email or call the company's service hotline to inquire about their wide range of products. Customers may also connect with Rock4Less AZ through their official social media pages to stay in touch with their latest news and important announcements.
