

Sandstone Health Updates Community On Texas Chiropractor Locations

September 26, 2019

September 26, 2019 - PRESSADVANTAGE -

Sandstone Health, a healthcare center, is reaching out to the wider community to inform about their multiple service locations, spread across Texas. The health center specializes primarily in chiropractic treatments. More information about the services they provide can be found at the following link: [Chiropractic Specialties](#).

According to the center's website, Sandstone Health provides chiropractic services across their locations in Montgomery, Magnolia, Conroe and Spring/Harmony. They also run a Center for Neurofeedback in Shenandoah, Texas.

Dr. Tony Deramus, a representative for Sandstone Health, says, "At Sandstone Health we are all about providing state-of-the-art health care in a warm and naturalistic surroundings. We take a holistic approach to healing our patients, and believe that comfortable amenities in a relaxing atmosphere matter as much as the actual treatments we provide—and we provide the best treatments. Our philosophy is to provide the best possible treatment recommendations and then allow our patients to choose the type of care they wish to

receive.?

The center claims that they take great care in choosing each aspect of the design of their practices, from the name of the practice to the color schemes. The intent, according to the center, is to create a warm and inviting place for their patients to visit.

According to the center's website, the name Sandstone was chosen due to the following description and meaning behind the word "sandstone": sandstone is a stone of creativity. It helps to build and strengthen the cohesiveness and solidarity within relationships. It encourages truth and promotes clarity in thought and sight. Sandstone balances one's reality and facilitates ease of movement and change. It dispels abrasiveness of character and promotes loving acceptance of humanity. It discourages bad tempers and general grouchiness.

Dr. Deramus continues, "We hope to create lasting relationships with patients who are committed to regaining their health, and who allow us to participate in their full recovery. The committed patients who listen and take action on our recommendations get the best results. Sometimes patients don't realize that their lifestyles contribute to many of their health problems, so we ask our patients to be proactive in their care. We are cognizant of our patients' busy schedules, and so strive to eliminate the hassles of lengthy doctor's visits while maintaining the level and quality of care our patients have come to expect."

Sandstone Health's dedication and commitment to their patients is evident in the customer reviews they receive. On Facebook, the health center maintains a perfect score (with reviews from over 120 former and active patients). Amy Leigh Koesters says in her review, "This was my first experience this week as a patient of chiropractic care. I had preconceived reservations about how I would feel about a chiropractor working on my body. I have been pleasantly surprised each day (3 days in a row) in the care I received, from the office staff to the nurses and chiropractic doctors. I came in Monday, barely able to walk, enduring excruciating pain and, 72 hours later, my pain has greatly decreased. I walked out today with a solid four week plan to start to heal my body. I just happen to fall into the care of Dr. Reese out of desperation and, as it turns out, he is a blessing in disguise as it is looking like this is a wellness therapy I can't live without. I am thrilled to be a patient and very much looking forward to healing and improving my quality of life."

In another Facebook review, Jeni Hegyesi Duffy says, "Absolutely recommended! The staff is amazing and treat everyone like family. The treatments available are fabulous and the results have turned me from a staunch non-believer of chiropractic care to someone who is now in so much less pain and so much better, physically and mentally. I truly cannot say enough about this place; specifically the Montgomery location. Thank you. I feel so much better already!?"

Those who want to learn more about Sandstone Health and the services they provide can find further information on the center's website. Interested parties may also get in touch with Dr. Tony Deramus directly to learn more. Additionally, Sandstone Health maintains a Facebook page through which they share healthcare tips, information about events, post pictures, and interact with their clients.
