

NJ Center For Cool Sculpting Offers Fat Elimination Procedures

September 25, 2019

September 25, 2019 - PRESSADVANTAGE -

Summit, New Jersey based plastic surgery clinic NJ Center For CoolSculpting is reaching out to the wider community to announce that they are providing CoolSculpting services for those who want to eliminate their body fat. The center, a Summit division of Ethos Spa, claims to be the top New Jersey clinic for CoolSculpting.

Hardik Soni, a representative for NJ Center for CoolSculpting, says, "We are the premiere center for CoolSculpting in New Jersey and we are absolutely committed to providing the safest and most effective treatments to reduce stubborn, unwanted fat in your body. Fat can be a very stubborn thing at times and there are parts of your body where it may never go away, no matter how hard you diet and exercise. That's where we come in. Our mission is to help you look and feel your best—both inside and outside."

Soni continues, "Our staff consists entirely of board-certified doctors, certified aestheticians, and licensed physician assistants who are collectively regarded as national leaders in body contouring, which means our patients get nothing less than the best. At our CoolSculpting center, we perform hundreds of body contouring sessions each month in the setting of our peaceful and luxury office."

As Soni explains, CoolSculpting, known among the medical community as cryolipolysis, is a leading non-invasive fat-reduction treatment that freezes and thus eliminates fat. According to Soni, CoolSculpting is a pain-free alternative to liposuction.

Soni says, "The treatment is FDA-approved and very safe. The process is very simple: first, you will need to sit down with one of our physicians for a consultation, during which you will discuss your goals and treatment plan. Typically, one procedure will eliminate roughly 20% of body fat from the target area, and people often achieve their desired results with just one CoolSculpting treatment. However, if you want a more dramatic result, you can undergo three or more treatments, usually over a 6-8 week period. The best part about CoolSculpting, of course, is the fact that there is no recovery period per se; you can return to your normal activities the same day as your treatment, whether that means working, going to school, or even exercising." More information about CoolSculpting can be found at: <https://sites.google.com/site/coolsculptingnewjersey/>

The clinic's dedication to helping their patients eliminate stubborn body fat and achieving the results they want has earned them a good standing with the community, as made evident by their online reviews. On Google, NJ Center for CoolSculpting maintains an average rating of 4.9 stars. A review by Joanna B. reads, "I had a great experience with CoolSculpting of my abdomen and flank area. Lauren was very attentive and caring, which made the procedure very comfortable for me. I highly recommend Lauren and Ethos Spa if you are considering CoolSculpting."

Another patient of NJ Center for CoolSculpting, Lesley Hamilton, praises the center in her testimonial, saying, "The treatment itself was not uncomfortable. Afterwards, I felt great. I didn't really notice anything for about 30 days. After day 30 until about a month later, I started noticing that my favorite jeans were not as tight anymore. I wasn't having to suck in to get them buttoned. In the two month period following my CoolSculpting® procedure, I was back in my favorite pants and they felt great!"

Anne McCarthy, another patient, says, "It's subtle at first, and then a month later you look and go, "Wow!" It really did something! It really moved the bar for me and I'm feeling better about myself already. It feels so good to put on anything and know I look as good as I've ever looked. I didn't say that or feel that when I was in my 20s, 30s, or 40s."
