

State of the Art Technology Simplifies Laser Hair Removal NJ

September 30, 2019

September 30, 2019 - PRESSADVANTAGE -

Ethos Spa, Skin and Laser Center is a premier laser hair removal center in New Jersey and as part of their ongoing commitment to excellence, recently announced that they have new and updated lasers. This new technology is already available for use and has been well received.

Both men and women often wish that they could reduce unsightly facial and body hair. It is not a new concept for throughout the centuries people have wanted to remove facial hair. Ancient Egyptians, for example, used tweezers made of seashells to remove hair. Hairlessness was considered a signifier of having money and being in a highly placed social position.

Times have changed and so have hair-removal methods. Thanks to modern technology unsightly hair removal can now be achieved more effectively and more permanently than ever before. Hardik Soni, the owner of the premier Ethos Spa, Skin, and Laser Center in Summit, New Jersey, said, "There are all kinds of reasons why people wish to remove face and body hair and nowadays the process is painless for most

people.?

More and more people are choosing this option because the "before and after" speaks for itself as can be seen on their YouTube channel (<https://www.youtube.com/channel/UC6uBiPJqyjkJyPLwpmTZUbw>). The number of people seriously thinking about it is on the rise; partly because of the superior technology now available and partly because the cost of these treatments is much lower than it was even just a few years ago.

Gone are the days when body and facial hair could only be removed one hair at a time. The whole process is now far more efficient and less time-consuming. In the case of Ethos, the new Gentle YAG and Alexandrite lasers put out a cooling burst of cryogen milliseconds before each laser pulse. This makes clients much more comfortable.

The first Alexandrite laser for hair removal was actually developed in 1960, but at that time the lasers could only do one hair at a time and sometimes the skin was actually damaged. Although the basic design of these lasers has been around for quite a while, it wasn't until quite recently that they underwent a system upgrade which solved earlier problems. At Ethos, they only have new and updated lasers - the latest and best that modern technology has to offer.

Camilla Bradley has experienced several of Ethos' treatment offerings. She said the hair removal technique was what made the biggest difference in how she feels each and every day. "The Ethos website really spelled it out for me - how the process works, what to expect, and so on. This made me feel much more confident about having my hair removal done right here in New Jersey."

Ms. Bradley continued, "It is so much simpler now to have hair removed than it used to be. It seemed like, a few years back, that they had to go hair by hair to get it done. It took forever and by the end of the treatment, I was somewhat sore. Thankfully, that is no longer the case. I used to have to go to New York City if I wanted treatment. Now, with laser hair removal NJ as an option, I don't have to travel out of state to have these hair-removal treatments done. It's so much more convenient."

Ms. Bradley was concerned with unsightly facial hair and indeed, that is probably the primary concern for most people. Everyone likes to make a good impression when they first meet someone. They want to feel confident that they look their best particularly if they're going for a job interview.

Facial hair, however, is not the end of the story. Any unwanted or unsightly hair anywhere on the body can be a candidate for treatment. With the use of these modern lasers and a careful, thorough technique, a modern salon such as Ethos can achieve anything from a 60% to a 90% permanent reduction in unwanted hair.

In addition to their website and YouTube channel, more information about their hair removal techniques, and other services offered can be found on their Facebook page at <https://www.facebook.com/MyEthosSpa>.
