

Kremer Eye Center Opens New Lasik Surgery Clinic In Iselin, NJ

October 11, 2019

October 11, 2019 - PRESSADVANTAGE -

Kremer Eye Center, a leading eye specialist in Philadelphia, Delaware and New Jersey, is pleased to announce the opening of their newest eye care center. Patients may find the new premises at 485 US-1, Building A, Suite #140, Iselin, NJ 08830, adjacent to its affiliate Ophthalmology practice, Omni Eye Services.

Amy Stoller, head of digital marketing for Kremer, explains that the clinic specializes in advanced custom bladeless Lasik and vision correction treatments. These include both refractive treatments and surgical procedures like LASIK, Visian ICL, INTACS® corneal implants, Refractive Lens Exchange, cataract surgery, glaucoma treatments, cornea treatments, oculoplastic surgery and dry eye treatments. "Kremer is proud of the fact that they have been at the forefront of the vision correction field for nearly 40 years. From the very first LASIK surgery performed in North America to the introduction of one-stitch and eventually no-stitch cataract surgery, we have advanced eye care in both the Philadelphia region and the country as a whole," she says.

Meanwhile, Kremer's new practice in Iselin, NJ is being led by leading Cherry Hill surgeon, Dr. Debra Malley, a Board-Certified ophthalmic surgeon who specializes in Laser Vision Correction and has been performing

LASIK since 1996. She is currently an active member of the American Academy of Ophthalmology, American Society of Cataract and Refractive Surgeons and the International Society of Refractive Surgeons. Additionally, Dr. Malley has been selected as a Castle Connolly Top Doctor in 2018 and 2019, a Philadelphia Magazine Top Doctor in 2019 and a NJTopDoc in 2019. Dr. Malley will be the in-house surgeon at both the Kremer Cherry Hill and Iselin, NJ locations.

As noted on the eye clinic's website, Kremer Iselin New Jersey utilizes the latest iDESIGN® Refractive Studio from Johnson & Johnson, the only system to use topography-integrated, Wavefront-guided technology, which allows doctors to take a precise measurement of the eye to deliver a LASIK procedure personalized to the individual patient. This technology enables eye specialists at Kremer to serve more patients, including those with myopia, hyperopia, mixed astigmatism and monovision in presbyopic patients. In addition, Kremer's newest surgical center in Iselin, NJ features a brand-new and state-of-the-art refractive suite that offers extensive pre and post-operative care. Kremer is also affiliated with over 1,000 Optometrist offices throughout the greater Philadelphia, New Jersey and Delaware regions.

Founded in 1980, Kremer is a leader in carrying out advanced refractive treatments and surgical procedures on visually impaired patients. In fact, many of their previous patients attest to the clinic's commitment to utilizing the latest technologies and procedures to accelerate recovery time and significantly improve one's vision.

One of their patients, Karla H., says in a Yelp review, "I am so glad I chose Kremer Eye Center for my LASIK procedure. The entire team at Kremer was so helpful and knowledgeable about the process. I felt like I was in the best hands the entire way. I have been considering corrective surgery for years but was always nervous about the possible side effects. The clinic's reputation made the decision much easier and I'm so glad I finally went through with it. I was seeing 20/20 the morning after my surgery, and it still hasn't quite sunk in that I don't have to wear contacts or glasses again. I also liked the flexibility of them having multiple offices to choose from for my consultation and follow up appointments. Highly recommended."

Meanwhile, Hala Tahan says in a 5-star Google review, "The results of my LASIK procedure at Kremer are amazing. The whole process was so smooth and seamless. The staff were professional and knowledgeable, which is always reassuring. And the results, for someone who's worn glasses and contacts for over 20 years, are mind-blowing. I have to remind myself that I don't have contacts in because that's how clear my vision is now. My only regret is that I didn't do this sooner. I'd recommend the folks at Kremer every time."

Patients can schedule their complimentary LASIK consultation appointment on their website, www.KremerEyeCenter.com or by calling 1-800-694-3937. Furthermore, interested parties may connect with

Kremer Eye Center Iselin through their official social media pages to learn more about their latest news and important announcements.
