Newport Beach Pest Control Company Hires New Employee

September 16, 2020

September 16, 2020 -
Pest infestations are on the rise in Orange County and the biggest reason for this is because everyday treatments like diy methods and over the counter products aren?t as effective as they used to be. These treatments aren?t effective anymore because pests have adapted and become pretty much immune to the chemicals used in these methods. Due to this, Orange County has fallen victim to more infestations than ever before. Luckily, Newport Beach Pest Control has been providing pest control services to handle the spread of pests.

The company has been providing professional and reliable pest solutions to residents and business owners in the area for over fifteen years. They have a lot of high star reviews online and are known to have the most effective and affordable services compared to any other pest control company in the area. Their team of exterminators have been professionally trained on how to treat every single species of pest in the area plus more. They can handle any pest infestation they are faced with so if people think they have a problem Newport Beach Pest Control is worth a try.

They have grown really quickly over the years from when they started. They opened with only a team of three employees and have grown into a major pest control company in Newport Beach. They recently grew a little more by hiring a new exterminator onto their team. David Casey is their newest professional pest technician. The president of the company welcomed David over the weekend, ?I am happy to announce the newest member on our team; David Casey. David has experience with treating just about every species of pest in the area. He has been in this industry for over nine years. He constantly goes to pest control seminars and workshops all around the country every year. Because of this he has a lot of knowledge to bring to the table and I know he is going to do great at helping keep our community safe and healthy.?

The company is known to be the most reliable and affordable pest control company in the area. Their services guarantee long lasting protection no matter how bad the pest infestation is. They take preventative

measures to make sure the pests never invade the target property in the future as well. Newport Beach Pest Control is open from 24 hours to help with any emergency people might be faced with. They can be contacted by phone or on their website at https://newport-beach-pest-control.business.site/. An employee of the company said, ?Pests are really hard to treat once they invade an entire property. If people think they have a potential infestation on their property, they should contact us immediately. We would be happy to help.?
