

Rodent Exterminators Providing Pest Control Services to Lake Balboa

September 04, 2020

September 04, 2020 - PRESSADVANTAGE -

Quality Pest & Rodent Exterminators just opened their doors on Tuesday and business has been booming for them. They have helped hundreds of families this week with all kinds of pest infestations. Some of the most common pests that they have been treating are termites, cockroaches, and ants. The company helped over two hundred people in just the first day. They offer a team of highly trained, professional exterminators that know how to treat any pest in the Los Angeles County area. They each have had years of prior experience in pest control and can handle any pest infestation out there, no matter how bad. Their main goal is to help as many families fight their pest control issues because they believe no family should have to deal with the stress of unwanted pests in their homes.

The president talked about the opening of Quality Pest & Rodent Exterminators on Thursday in an interview, "We are really happy at how many families and business owners we have helped so far this week. We are working hard to make sure no family in Los Angeles County has to deal with a pest infestation ever again. Pests are disgusting and can be tricky to get rid of. That's why our exterminators are professionally trained to treat every species of pest in a fast and reliable way. Our team also has the newest pest control equipment to take care of the job safely and effectively."

An employee of the company recently explained why they are getting so many pest calls, "We have noticed over the years of working in pest control that pests infestations are on the rise. There are continually more pest infestations every year compared to the year prior. The reason for this is because pests are becoming more resilient towards every day treatments like pest control sprays and traps and DIY methods. Professional methods are the way to go because they not only ensure that all the current pests are taken care of, they also provide routine checkups to make sure the pests never come back."

The company provides custom services which are built for each individual species of pest. These services make sure to take care of each pest in the most effective way to ensure the best results. They offer emergency services for wild and distressed animals. Wild animals can be very dangerous so no one should try to handle it on their own. If it is a dangerous situation, call a professional. They also provide routine

checkups to make sure the pests stay out.

Pest infestations spread quickly, give Quality Pest & Rodent Exterminators a try. They can be reached by phone or go to their website at <https://pestcontrollakebalboa.com/>. Their hours are 8 a.m. to 6 p.m. Monday through Friday and 9 a.m. to 5 p.m. on Saturdays. They are closed on Sundays. The president of the company said recently, "If you think you have a pest infestation, call asap! The problem will only get worse and the pests will spread quickly."
