

Top Quality Exterminators Notice of Merger

September 03, 2020

September 03, 2020 - PRESSADVANTAGE -

Top Quality Exterminators has been offering professional pest control treatments to the Los Angeles County area for over forty years. They have helped thousands of families and business owners with residential and commercial property infestations.

They have a team of ten pest exterminators that have been fighting hard to fend off the worsening battle against pest infestations. The company exterminates every species of pest in the area including cockroaches, bees, ants, fleas, and beetles. Each of their services are custom built so that every extermination is taken care of in the most efficient way.

The company recently announced that they are going to be merging with another smaller unnamed pest control company. The merger states that Top Quality Exterminators will get enough brand new pest control equipment for the entire exterminator team, brand new utility vehicles for the team, and five brand new employees that will be transferring over this coming week.

The president of the company recently spoke about the merger in an interview, "This company has been fighting pest infestations for decades and we want to continue to fight for the families and business owners in Los Angeles County. This merger will add five more professional exterminators for the team and brand new equipment to help us better fight off the rising threat of pest invasions. I talked to the new team members yesterday and they all seem really excited to start. I know they are going to be a great addition and am glad to be able to welcome them to Top Quality Exterminators. I know they will help as many families as possible with pest problems."

The merger will help the company grow substantially. They say that their main goal is to allow no family to have to stress about a pest infestation. Top Quality Exterminators offers custom services for each species of bug to make sure that each treatment is done in a sense to return the best results. They also offer emergency services for wild or distressed animals and routine checkups to make sure the pests are staying out in the future.

A representative of the company went on to talk about the rising risk of new pest infestations in the area, "Pests are getting trickier and trickier to treat. They are becoming more resilient and almost immune in some cases to doing it yourself treatments and over the counter products. In some circumstances, professional treatment is the only thing that will fix the pest problem. They multiply quickly and spread fast so if you think you might have an infestation give us a call so that we can take a look."

The company has great reviews and a lot of experience by helping over thousands of families throughout the years. Property owners are encouraged to call them if they need help with pests. They can be reached by phone or on their website at <https://pestcontroelsegundo.com/>. Their hours are from 8 a.m. to 6 p.m. on weekdays and from 8 a.m. to 5 p.m. on Saturday. An employee of Top Quality Exterminators recently said, "Pests spread very quickly so if you think you have a pest problem give us a call immediately. We can give you a free quote and take a look at your property."
