

# Local Exterminators Getting Rid of Rodents in Lodi, CA

*March 13, 2020*

March 13, 2020 - PRESSADVANTAGE -

Rodents, rats and mice, are a common nuisance in the Lodi, CA area. No property is safe from the potential risk of having a rodent invasion but property owners can definitely help prevent them from becoming a problem. Pest Solutions in Lodi has announced they are helping businesses and homes in the San Joaquin County area get rid of the rats and mice invading their property.

"Rodents are like any other pest. They find a way to get inside a property and if they find food, shelter and water, they set up a home inside the structure. Even if your home or business is really clean, these pests could still invade and set up shop inside," the business manager stated.

Mice and rats are hazardous pests to have because they can carry and transmit diseases, they leave their waste behind when scurrying around a property and they chew through just about anything. This could be cables, wires, walls, valuables, furniture, etc. Their sharp teeth help them gnaw on things if they think food is within reach.

"If you want to make sure the mice and rats stay out of your property, you're going to want to make sure they don't have an easy way to get in. Our pest control Lodi CA exterminators can inspect your property to determine where they're entering so you can be sure to seal them up," the company manager stated.

Many times property owners can inspect their own property's exterior and determine where the mice or rats may be getting in and then address the opening correctly. This alone will drastically lessen the risk of a rodent invasion for any property. But if they're inside property owners will still have to address the existing rodents. It will just be easier when more aren't coming in while dealing with the present ones.

To learn more about the rodent control services provided by Pest Solutions in Lodi residents can contact them by phone or visit them at [pestcontrolloдика.net](http://pestcontrolloдика.net). The business owner stated that many times they can provide an estimate for service by phone without an inspection but encourage residents to contact them to

see how they can help.
