

Montebello Pest Control Welcoming New Team Member

August 25, 2020

August 25, 2020 - PRESSADVANTAGE -

Montebello Pest Control has been providing professional pest control services to the area for some 10 plus years. They are a trusted company with a lot to offer. They have been helping local residents fight off all species of pests like bed bugs, cockroaches, fleas, spiders, flies, and more. They have helped thousands and thousands of customers and plan to help thousands more.

On Monday, Montebello Pest Control hired a new employee, Michael Mosby. The president was interviewed about the new employee just recently, "Mike and I have been close friends for some time now. He and I met at our first job when we were teenagers where we also did pest control. I am glad to see Mike again and I know he is going to be a great addition to the team. He has a strong work ethic and a positive can-do attitude. Not to mention over 20 years in pest control service. We are excited to welcome him to the neighborhood and I know he is excited to start defending our local homes from pest infestations."

The company now has 18 employees including Michael, which is twice as many as they had this time last year. The company is growing quickly and looks to be helping over 500 customers every month. Montebello Pest Control offers custom-built services that are unique to each species of pest. This makes sure each infestation is taken care of in the right way and returns the best results.

A representative of the company went on to talk about the rising number of pest infestations in Los Angeles County. "Pests are becoming more difficult to treat over the years. They are built to last through natural threats and are adapting to pest control treatments. Although over-the-counter products are staying the same, the pests are advancing. This means the over-the-counter products are becoming less effective every year. Montebello Pest Control offers the best pest control solutions out of every pest control company in the area. Our services are advancing just like the bugs so that we stay caught up with them and make sure they don't take over our homes and commercial buildings."

When pest control service is required for a residential or commercial property, Montebello Pest Control has

multiple solutions to help. They can be reached by phone or their website at <https://montebellopestcontrol.com/>. They are open from 9 am to 5 pm on weekdays and from 9 am to 1 pm on Saturdays. They are closed on Sundays.
