

Superior Pest Extermination Provides Services to Redondo Beach Area

September 01, 2020

September 01, 2020 - PRESSADVANTAGE -

Superior Pest Extermination is a professional company that provides pest control to the Redondo Beach area. The company has already helped close to seven hundred families with pest infestations and wild animals in the past couple of years.

The company has a team of 12 professionally trained exterminators who all have brand new equipment that helps them treat any pest infestations out there in the quickest time possible. The company has said that they are excited to continue to help as many families as possible and hope to grow their service area in the future.

A representative of the company talked about the opening of Superior Pest Extermination, "Pest infestations are on the rise in Redondo Beach. The main reason for this is not because people aren't taking care of their houses as much. The main reason is pests are adapting and becoming more resilient to treatments most people use. Treatments like over the counter sprays and pest traps don't work as good as they used to."

The rep then continued, "Due to this, pests are invading more properties and are able to spread faster than ever before. We realised that this is a problem so we decided to start this company in order to provide affordable, safe, and professional treatments to Los Angeles County residents and business owners."

The company's top selling treatments so far are their custom pest control services. These services are custom built specifically for each species of pest. The company says this guarantees the best results in the quickest amount of time and makes sure that the pests stay out in the future. These treatments were designed by pest control veterans who have been treating pests for a very long time.

They also offer routine checkups. These checkups are great for making sure that the pests never come back because once they get into your property, they spread like crazy. Most of the time, by the time the homeowner realizes there is an infestation, the pests have already taken over the whole property.

The exterminators look for any possible entry points that the pests might use to get into the property and do

additional sprays to make sure the pests don't come anywhere near. Additionally, the company offers emergency services for dangerous situations. These situations usually include wild or distressed animals but could also include pests like bees.

When a pest issue is suspected in any property, residents can give Superior Pest Extermination a try. They have great reviews and provide treatments to the entire Redondo Beach area. They can be reached by phone or on their website at <https://pestcontrol-redondobeachca.com/>. Their hours are 8 a.m. to 6 p.m. on weekdays and 8 a.m. to 5 p.m. on Saturdays. They are closed on Sundays.

An employee of the company said, "Pest infestations spread quickly. Usually when people notice pests in their home it is too late for treatments other than professional services. If you think you have an infestation, give us a call today and we can help get rid of your pest problems."
