

Best Lauderhill Pest & Termite Merger Deal

September 04, 2020

September 04, 2020 - PRESSADVANTAGE -

Best Lauderhill Pest & Termite has been providing pest control solutions to Broward County residents for over two decades now. They have helped thousands of homeowners and business owners over the years with just about any pest out there. Their services are highly rated and are very trusted in the community. They are known to be reliable and fast.

Recently the company announced that they will be merging with another smaller company that is deciding to remain unnamed for right now. The company has been growing like crazy recently and the board of directors thinks that this merger will help them grow even more. The merger states that Best Lauderhill Pest & Termite will receive brand new pest control equipment, five new utility vans, and a new employee. The merger documents are scheduled to be signed on Friday and if they are signed the merger will go into effect next week.

The company recently noticed a rise in pest control issues in the area. Their president said in an interview yesterday, "Pest infestations are on the rise because pests are becoming resilient to everyday treatments. Some of these treatments include do it yourself methods and over the counter products like pest sprays and traps. These pest control methods used to work great but, unfortunately, do not anymore. Professional services are becoming the only reliable way to take care of a pest infestation in a residential or commercial property."

They offer three main services at the company. Their most popular service, their signature custom treatments, are specifically designed for each species of pest. These custom treatments are designed by some of the best pest exterminators in the area. The company says that by performing custom services for each type of pest, they can ensure that each infestation is taken care of reliably and in a timely manner.

Their routine checkups are also extremely popular. The company schedules visits with each customer and will come to the target property and make sure that there is no way for pests to get into the building. Their exterminators investigate the entire property and take all of the proper precautions to eliminate the possibility of any future pest problems. Lastly, their emergency services are super useful when residents are faced with

dangerous situations. These situations usually include wild animals, distressed animals, or wasps.

If local residents have a pest problem, they shouldn't wait to call a professional. They spread quickly and can take over an entire property in one night. If someone thinks they have pests in their home or business, they should contact Best Lauderhill Pest & Termite today. They are open from 8 a.m. to 5 p.m. on weekdays and 8 a.m. to 3 p.m. on Saturdays. They can be contacted by phone or on their website at <http://lauderhillpestcontrol.com/>. They offer free consultations and can answer any questions about pest control.
