

Coral Gables Pest Experts Welcome Jesse the Exterminator

September 04, 2020

September 04, 2020 - PRESSADVANTAGE -

Pest Control of Coral Gables is the newest pest control company in Miami-Dade County. The company just opened this week and has already helped hundreds of homeowners and business owners in the area with their pest problems. They have a team of highly trained professional exterminators that are all experienced in successfully treating every type of pest in the area. The company offers relatively affordable treatments that are known to be the most reliable in the area. Their reviews say that the team is very fast and friendly.

They are open from 8 a.m. to 5 p.m. on weekdays and from 9 a.m. to 1 p.m. on Saturdays. They are closed on Sundays. The company offers custom treatments, routine checkups, and emergency services. The most popular service they offer is their custom treatments. These treatments are unlike any other treatments in the area because they are custom designed specifically for each species of pest. The company says that by doing this they can guarantee the most efficient, safest, and most reliable treatments to cure any pest problem in the area. Their routine checkups are also very popular because their exterminators make sure that the pests stay out of the property. Their team of exterminators look for any holes or entry points that the pests might use to get in and out of the property. They then block up this entry point and make sure the pests have no other way in.

The company was started because there has been a huge increase in the number of pests in the area. Pest infestation cases are on the rise and the company believes this is mostly due to the pests adapting to everyday treatments. The president of the company explained it more thoroughly in a recent interview, "There has been a large increase in the number of cases of pest infestations in the past few years. The main reason for this is because the pests are growing immune to everyday methods of treating pests like do it yourself treatments and over the counter products like pest sprays. These treatments don't work on pests as well as they used to. We started this company to fight this problem and because we believe our custom services take care of pests more reliably than any other pest control company in the area."

Pest infestations spread very quick, try giving Pest Control of Coral Gables a call today. A representative of the company recently said, "Pests spread quickly. Once you see a pest in your home, bam! You already have a full blown infestation. Most of the time folks don't notice an infestation until the annoying pests have already taken over the entire property." They can be contacted by phone or on their website at <http://pestcontrolcoralgables.com/>.
