

Pest Control of Coral Springs Hires New Crew Member

September 04, 2020

September 04, 2020 - PRESSADVANTAGE -

Pest Control of Coral Springs has been providing pest control to the Broward County area for over fifteen years. They have helped thousands of families and business owners with various kinds of pest problems over the years. The company has a team of professionally trained exterminators. All ten of them have been highly trained on how to treat every kind of pest in the area.

The company has been growing a lot in the past few years. Due to this growth the team has been extremely busy so the company decided to hire a new employee. Frank Deaton is the newest addition to their team. Frank has twenty years of experience in pest control and knows how to treat every pest in Broward County. He has a lot of experience to bring to the table and seems like a great person to have battling our county's pest problems. A representative of Pest Control of Coral Springs recently said, "Frank is going to be a great addition to the team. We only hire the best of the best and, well, Frank is exactly that. He has a great work ethic and a can-do attitude along with twenty years of pest control. We are happy to welcome him to the team and are excited for him to start protecting our neighborhood next week."

Pest Control of Coral Springs recently announced that they have noticed a huge spike in pest infestation cases in the area. The company believes that this is due to the pests adapting to everyday treatments. Some of these treatments include pest sprays, pest traps, and do it yourself methods. These tactics used to work great part of the time but barely work at all anymore. They say that professional help is becoming the only option in some scenarios to defeat a pest infestation.

The company offers custom treatments, routine checkups, and emergency services. Their custom treatments are extremely popular because they are built specifically to treat the targeted pest. Each treatment is specifically designed for every species of pest in the area. This ensures the most efficient and effective treatments for the residents of Broward County. Their routine checkups are also very popular because they make sure that the pests stay out of the property. Their final option is emergency services. These are great for when people are faced with uneasy circumstances like wild or distressed animals or bees and wasps.

The company says that pest infestations grow fast, it is a good idea to call a professional immediately. They can be contacted by phone or on their website at <http://pestcontrolcoralsprings.com/>. Their hours are 8 a.m. to 5 p.m. on weekdays and 8 a.m. to 12 p.m. on Saturdays. They are closed on Sundays. A representative of the company recently said, "Once people notice a pest in their house it is usually too late. Pest infestations have usually already taken over the whole property. If you think you have a pest problem, call us today for a free consultation."
