

Tampa Exterminators Hiring New Exterminator

September 04, 2020

September 04, 2020 - PRESSADVANTAGE -

Tampa Exterminators have been providing professional pest services to Hillsborough County for over thirty years. The company has helped thousands of families over the years and plans to continue to grow their service area so that they can help as many people as possible. They believe that no one should have to deal with the stress of a pest infestation in their residential or commercial property.

The company recently announced they are hiring a new employee. Joel Humphry was recently hired by the company on Wednesday. Joel will be starting work next week. He will first go through the company's professional pest control training that makes sure their exterminators are prepared for every pest infestation out there. This will be Joel's first job as a pest control specialist.

The president of Tampa Exterminators recently talked about Joel in a new interview, "We are really happy to welcome Joel to the team. We are excited to be able to work with him. He is a sharp kid and has a great work ethic. He learns quickly and has a great can-do attitude. I know he is going to be a great addition to the team and will help immensely in the fight against Tampa pests."

The company provides custom built services that are designed specifically for each species of pest. They say that this allows their exterminators to control any infestation out there in the quickest, safest, and most reliable way all while staying at an affordable price. Each service is designed specifically for a certain pest by a professional exterminator. This means that their exterminators not only get rid of every pest on an infected property, but also make sure that the pests never come back. They also offer emergency services for dangerous situations. They know how stressful and dangerous wild animals can be so they make sure to promptly answer any call they get so that they can handle any emergency out there. Their final service is routine checkups. Their routine checkups are popular because they prevent any possibility of future pest infestations. Rather than fixing a problem when it happens, they make sure a pest problem never occurs.

Tampa Exterminators can answer most pest questions and can help with any pest problem in the area. They would be glad to give any information needed to help their customers. They can be contacted by phone or on their website at <http://gotampaexterminators.com/>. Their hours are 8 a.m. to 5 p.m. on weekdays and 8 a.m.

to 12 p.m. on Saturdays. They are closed on Sundays.

A representative of the company recently said, "Pest infestations spread quickly so if you think you have a pest problem, call immediately. We can help you get rid of any pests you might have in your residential or commercial property."
