

Tampa Pest Control Service Announces Merger Deal

September 04, 2020

September 04, 2020 - PRESSADVANTAGE -

Tampa Pest Control has been providing professional pest control service to the Tampa, Florida area for over twenty years. They have helped thousands of Tampa residents over the years and have a lot of great reviews to show for it.

The company provides custom treatments, emergency services, and routine checkups. Their custom treatments are each designed specifically for each species of pest. This ensures the best results and allows the exterminators to get rid of the pests in the quickest and most reliable way. Their emergency services are great for times when people have to deal with wild or distressed animals. This service is needed for anyone faced with a dangerous situation against a pest, rodent, or wild animal. Their routine checkups are useful because the exterminators make sure that the pests are staying away from the property. They find possible entry points that the pests might be using and fix it so that the pests can't get in or out.

The company has been growing like crazy over the past few years mainly because of the rise in pest infestations in the area. The company has been trying to grow their service area as much as possible and they might've just struck the perfect deal.

Recently, the company announced that they will be merging with another smaller company that has decided to remain anonymous for the time being. The merger states that the unnamed company will give Tampa Pest Control brand new pest control equipment along with new pest control utility vehicles. There will also be three new employees transferring from the unnamed company to Tampa Pest Control.

The president of Tampa Pest Control said in a recent interview, "We are always looking to improve and grow. Our company has been able to grow our service area like crazy over the past few years and we are excited to be able to grow our service area even further into the future. This merger is going to help boost this growth. We will have new equipment and utility vans to better perform the jobs as well as three new team members. We are excited to welcome the new exterminators and professionally train them in our pest control courses. This merger will allow us to help more people more reliably than ever before."

Pest infestations can grow quickly. Once a pest gets into a building, they will spread everywhere seemingly overnight. If there is a pest infestation in residential or commercial properties, Tampa Pest Control is the best bet. Their custom services are highly reviewed by local residents and their routine checkups are known to keep all the pests out of any property. They can be contacted by phone or at their website, <http://tampa-pestcontrol.com/>.

They are open from 9 a.m. to 5 p.m. on weekdays and 9 a.m. to 1 p.m. on Saturday. They are closed on Sundays. An employee of Tampa Pest Control recently said, "Our services are fast, affordable, and reliable. We are the best option for any pest infestation in the area. Call us today for a free quote!"
