

Allen Exterminators to Provide Premium Pest Control Solutions to Collin County

September 04, 2020

September 04, 2020 - PRESSADVANTAGE -

Allen Pest Control & Exterminators is a new pest control company that has been providing quality pest control services to residents of Collin County for many years now. The company just opened last Monday and has already helped hundreds of families and business owners in the area. Their team of eight professional exterminators are all highly trained on how to effectively treat any pest in the area. They all have prior experience in pest control before this job so they already know a lot about how to treat any pests in the area.

The company was started because there has been a large increase in the number of pests in the area. The president of the company goes on to explain, "We started Allen Pest Control & Exterminators because we noticed that this community needs quality pest control services more than ever. There has been a huge increase in the number of pest infestations in the area due to pests adapting and becoming immune to some treatments. The pests have effectively adapted to most everyday treatments including DIY methods and over the counter products like sprays and traps. Some pests can only be treated by professionals and most pests can only be reliably treated by professionals nowadays. We decided to start this company so that we can offer affordable and reliable pest control services to the fine folks of Allen, Texas."

The company offers three main services: custom pest and rodent treatments, routine checkups, and emergency responses. Their custom treatments are built specifically for each species of pest. This means that no treatments are the same. The company says this ensures that each infestation is taken care of in the most efficient and effective way possible. Their routine checkups are nice because they prevent infestations from ever happening in the first place. Customers can schedule these checkups monthly, quarterly, biannually, or annually.

Their team of exterminators go to the target property and examine it for any weak points that the pests might use to get in. They will then seal those entry points and will take multiple other preventative steps to make sure pests have no way of invading the property. Finally, their emergency response service is very useful for when customers are met with a dangerous situation involving wild animals or pests like wasps or hornets.

Property owners worried that they have an issue with pests should give Allen Pest Control & Exterminators a try. Contact them by phone or go to their website at <https://pestcontrolallen.org/>. They are open from 8 a.m. to 5 p.m. on weekdays and from 9 a.m. to 1 p.m. on Saturday. They are closed on Sundays. A representative of the company recently said, "If you think you have pests in your property make sure to contact a professional immediately. It won't take long for the pests to turn into a full blown infestation of the entire property."
